APPENDIX A – PROXY VOTING POLICIES AND PROCEDURES	A-1

THE FUNDS

The Funds are each a diversified series of Northern Lights Fund Trust III, a Delaware statutory trust organized on December 5, 2011 (the "Trust"). The Trust is registered as an open-end management investment company. The Trust is governed by its Board of Trustees (the "Board").

Each Fund may issue an unlimited number of shares of beneficial interest ("Shares"). All Shares have equal rights and privileges. Each Share is entitled to one vote on all matters as to which Shares are entitled to vote. In addition, each Share is entitled to participate equally with other Shares (i) in dividends and distributions declared by the Fund and (ii) on liquidation to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares are fully paid, non-assessable and fully transferable when issued and have no pre-emptive, conversion or exchange rights.

The Funds are managed by PlanRock Investment Management, LLC (the "Adviser"). The Board may start other series and offer shares of a new fund under the Trust at any time.

Each Fund issues and redeems Shares at net asset value ("NAV") only in aggregations of 10,000 Shares (each a "Creation Unit"). Each Fund issues and redeems Creation Units principally in exchange for a basket of securities (the "Deposit Securities"), together with the deposit of a specified cash payment (the "Cash Component"), plus a transaction fee (unless waived). Shares are listed, subject to notice of issuance, on the NYSE Arca (the "Exchange"). Shares trade on the Exchange at market prices that may be below, at, or above NAV.

The Funds reserve the right to offer creations and redemptions of Shares for cash. In addition, Shares may be issued in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain on deposit with the Trust cash equal to up to 115% of the market value of the missing Deposit Securities. In each instance of such cash creations or redemptions, transaction fees, may be imposed and may be higher than the transaction fees associated with in-kind creations or redemptions. See PURCHASE, REDEMPTION AND PRICING OF SHARES below.

Exchange Listing and Trading

Shares are listed for trading, and trade throughout the day, on the Exchange. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of Shares will continue to be met. The Exchange may, but is not required to, remove the Shares from listing if, among other things following the initial 12-month period beginning upon the commencement of trading of Fund shares, there are fewer than 50 beneficial and/or beneficial owners of Shares for 30 or more consecutive trading days or any other event shall occur or condition shall exist that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will also remove Shares from listing and trading upon termination of a Fund or in the event the Fund does not comply with the continuous listing standards of the Exchange, as described in the Funds' Prospectus.

As in the case of other publicly-traded securities, when you buy or sell Shares through a broker, you may incur a brokerage commission determined by that broker, as well as other charges.

TYPES OF INVESTMENTS

A discussion of each Fund's investment policies and the risks associated with an investment in the Fund is contained in the Prospectus. The discussion below supplements, and should be read in conjunction with, the Prospectus.

An investment in a Fund should be made with an understanding that the value of the Fund's portfolio securities may fluctuate in accordance with changes in the financial condition of the issuers of the portfolio securities, the value of securities in general and other factors that affect the market.

An investment in a Fund should be made with an understanding of the risks inherent in an investment in securities, including the risk that the general condition of the securities market may deteriorate. Securities are susceptible to general securities market fluctuations and to volatile increases and decreases in value as market confidence changes. These investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies, inflation and interest rates, economic expansion or contraction, and global or regional political, economic or banking crises.

The existence of a liquid trading market for certain securities may depend on whether dealers will make a market in such securities. There can be no assurance that a market will be made or maintained or that any such market will be or remain liquid. The price at which securities may be sold and the value of the Shares will be adversely affected if trading markets

for a Fund's portfolio securities are limited or absent, or if bid/ask spreads are wide. The performance of a Fund may vary due to asset valuation differences: the Fund may fair value certain of the securities it holds. There may also be differences between a Fund's portfolio as a result of legal restrictions, cost or liquidity constraints. Similarly, liquidity constraints also may delay a Fund's purchase or sale of securities.

Securities of Other Investment Companies

Investments in closed-end investment companies, exchange traded funds and mutual funds involve certain additional expenses and certain tax results, which would not be present in a direct investment in such funds. Each Fund intends to limit its investments in accordance with applicable law or as permitted by Rule 12d1-4 under the Investment Company Act of 1940, as amended (the "1940 Act"). Among other things, such law would limit these investments so that, as determined immediately after a securities purchase is made by a Fund: (a) not more than 5% of the value of its total assets will be invested in the securities of any one investment company; (b) not more than 10% of the value of its total assets will be invested in the aggregate in securities of investment companies as a group; (c) not more than 3% of the outstanding voting stock of any one investment company will be owned by the Fund; and (d) not more than 10% of the outstanding voting stock of any one closed-end investment company will be owned by the Fund together with all other investment companies that have the same advisor. Under certain sets of conditions, different sets of restrictions may be applicable. As a shareholder of another investment company, a Fund would bear, along with other shareholders, its pro rata portion of that investment company's expenses, including advisory fees. These expenses would be in addition to the advisory and other expenses that a Fund bears directly in connection with its own operations. Investment companies in which a Fund may invest may also impose a sales or distribution charge in connection with the purchase or redemption of their Shares and other types of commissions or charges. Such charges will be payable by a Fund and, therefore, will be borne directly by Shareholders.

Each Fund intends to rely on Section 12(d)(1)(F) and Rule 12d1-4 under the 1940 Act which in conjunction with one another allow registered investment companies (such as the Fund) to exceed the limitations described above, provided the aggregate sales loads any investor pays (i.e., the combined distribution expenses of both the acquiring fund and the acquired funds) does not exceed the limits on sales loads established by Financial Industry Regulatory Authority ("FINRA") for funds of funds, and the registered investment company "mirror votes" any securities purchased pursuant to Section 12(d)(1)(F).

Closed-End Investment Companies

Each Fund may invest its assets in "closed-end" investment companies (or "closed-end funds"), subject to the investment restrictions set forth above. Shares of closed-end funds are typically offered to the public in a one-time initial public offering by a group of underwriters who retain a spread or underwriting commission of between 4% or 6% of the initial public offering price. Such securities are then listed for trading on the Exchange, the National Association of Securities Dealers Automated Quotation System (commonly known as "NASDAQ") or, in some cases, may be traded in other over-the-counter markets. Because the shares of closed-end funds cannot be redeemed upon demand to the issuer like the shares of an open-end investment company (such as a Fund), investors seek to buy and sell shares of closed-end funds in the secondary market.

Each Fund generally purchases shares of closed-end funds only in the secondary market. A Fund incurs normal brokerage costs on such purchases similar to the expenses the Fund would incur for the purchase of securities of any other type of issuer in the secondary market. A Fund may, however, also purchase securities of a closed-end fund in an initial public offering when, in the opinion of the Adviser, based on a consideration of the nature of the closed-end fund's proposed investments, the prevailing market conditions and the level of demand for such securities, they represent an attractive opportunity for growth of capital. The initial offering price typically will include a dealer spread, which may be higher than the applicable brokerage cost if a Fund purchased such securities in the secondary market.

The shares of many closed-end funds, after their initial public offering, frequently trade at a price per share, which is less than the NAV per share, the difference representing the "market discount" of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed-end funds, as well as to the fact that the shares of closed-end funds are not redeemable by the holder upon demand to the issuer at the next determined NAV but rather are subject to the principles of supply and demand in the secondary market. A relative lack of secondary market purchasers of closed-end fund shares also may contribute to such shares trading at a discount to their NAV.

Each Fund may invest in shares of closed-end funds that are trading at a discount to NAV or at a premium to NAV. There can be no assurance that the market discount on shares of any closed-end fund purchased by a Fund will ever decrease. In fact, it is possible that this market discount may increase and a Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the NAV of the Fund's shares. Similarly, there can be no assurance that any shares of a closed-end fund purchased by a Fund at a

premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

Closed-end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed-end fund's common shares in an attempt to enhance the current return to such closed-end fund's common shareholders. A Fund's investment in the common shares of closed-end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and NAV than an investment in shares of investment companies without a leveraged capital structure.

Exchange Traded Funds

ETFs are often passive funds that track their related index and have the flexibility of trading like a security. They are managed by professionals and typically provide the investor with diversification, cost and tax efficiency, liquidity, marginability, are useful for hedging, have the ability to go long and short, and some provide quarterly dividends. Additionally, some ETFs are unit investment trusts. Under certain circumstances, the Adviser may invest in ETFs, known as "inverse funds," which are designed to produce results opposite to market trends. Inverse ETFs are funds designed to rise in price when stock prices are falling.

ETFs have two markets. The primary market is where institutions swap "creation units" in block-multiples of, for example, 10,000 shares for in-kind securities and cash in the form of dividends. The secondary market is where individual investors can trade as little as a single share during trading hours on the exchange. This is different from open-ended mutual funds that are traded after hours once the NAV is calculated. ETFs share many similar risks with open-end and closed-end funds.

Foreign Securities

Investing in securities of foreign companies and countries involves certain considerations and risks that are not typically associated with investing in U.S. government securities and securities of domestic companies. There may be less publicly available information about a foreign issuer than a domestic one, and foreign companies are not generally subject to uniform accounting, auditing and financial standards and requirements comparable to those applicable to U.S. companies. There may also be less government supervision and regulation of foreign securities exchanges, brokers and listed companies than exists in the United States. Interest and dividends paid by foreign issuers may be subject to withholding and other foreign taxes, which may decrease the net return on such investments as compared to dividends and interest paid to a Fund by domestic companies or the U.S. government. There may be the possibility of expropriations, seizure or nationalization of foreign deposits, confiscatory taxation, political, economic or social instability or diplomatic developments that could affect assets of a Fund held in foreign countries. Finally, the establishment of exchange controls or other foreign governmental laws or restrictions could adversely affect the payment of obligations.

To the extent currency exchange transactions do not fully protect a Fund against adverse changes in currency exchange rates, decreases in the value of currencies of the foreign countries in which the Fund invests relative to the U.S. dollar will result in a corresponding decrease in the U.S. dollar value of the Fund's assets denominated in those currencies (and possibly a corresponding increase in the amount of securities required to be liquidated to meet distribution requirements). Conversely, increases in the value of currencies of the foreign countries in which a Fund invests relative to the U.S. dollar will result in a corresponding increase in the U.S. dollar value of the Fund's assets (and possibly a corresponding decrease in the amount of securities to be liquidated).

Depositary Receipts

Sponsored and unsponsored American Depositary Receipts ("ADRs"), are receipts issued by an American bank or trust company evidencing ownership of underlying securities issued by a foreign issuer. ADRs, in registered form, are designed for use in U.S. securities markets. Unsponsored ADRs may be created without the participation of the foreign issuer. Holders of these ADRs generally bear all the costs of the ADR facility, whereas foreign issuers typically bear certain costs in a sponsored ADR. The bank or trust company depositary of an unsponsored ADR may be under no obligation to distribute shareholder communications received from the foreign issuer or to pass through voting rights. Many of the risks described below regarding foreign securities apply to investments in ADRs.

Emerging Markets Securities

Investing in emerging market securities imposes risks different from, or greater than, risks of investing in foreign developed countries. These risks include: smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; possible repatriation of investment income and capital. In addition, foreign investors may be required to register the proceeds of sales; future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization, or creation of government

monopolies. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and devaluation may occur subsequent to investments in these currencies by a Fund. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries.

Additional risks of emerging markets securities may include: greater social, economic and political uncertainty and instability; more substantial governmental involvement in the economy; less governmental supervision and regulation; unavailability of currency hedging techniques; companies that are newly organized and small; differences in auditing and financial reporting standards, which may result in unavailability of material information about issuers; and less developed legal systems. In addition, emerging securities markets may have different clearance and settlement procedures, which may be unable to keep pace with the volume of securities transactions or otherwise make it difficult to engage in such transactions. Settlement problems may cause the Fund to miss attractive investment opportunities, hold a portion of its assets in cash pending investment, or be delayed in disposing of a portfolio security. Such a delay could result in possible liability to a purchaser of the security.

Concentration of Investments

A Fund may be susceptible to an increased risk of loss, including losses due to adverse events that affect the Fund's investments more than the market as a whole, to the extent that the Fund's investments are concentrated in the securities of a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector or asset class. Shares are subject to the risks of an investment in a portfolio of equity securities in an industry or group of industries in which a Fund invests.

Short Sales

Each Fund may sell securities short as an outright investment strategy and to offset potential declines in long positions in similar securities. A short sale is a transaction in which a Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline.

When a Fund makes a short sale, the broker-dealer through which the short sale is made must borrow the security sold short and deliver it to the party purchasing the security. A Fund is required to make a margin deposit in connection with such short sales; the Fund may have to pay a fee to borrow particular securities and will often be obligated to pay over any dividends and accrued interest on borrowed securities.

If the price of the security sold short increases between the time of the short sale and the time a Fund covers its short position, the Fund incurs a loss; conversely, if the price declines, the Fund realizes a capital gain. Any gain will be decreased, and any loss increased, by the transaction costs described above. The successful use of short selling may be adversely affected by imperfect correlation between movements in the price of the security sold short and the securities being hedged.

To the extent a Fund sells securities short, it will provide collateral to the broker-dealer and (except in the case of short sales "against the box") will maintain additional asset coverage in the form of cash, U.S. government securities or other liquid securities with its custodian in a segregated account in an amount at least equal to the difference between the current market value of the securities sold short and any amounts required to be deposited as collateral with the selling broker. A short sale is "against the box" to the extent a Fund contemporaneously owns, or has the right to obtain at no added cost, securities identical to those sold short.

Equity Securities

Equity securities include common stocks, preferred stocks and securities convertible into common stocks, such as convertible securities, warrants, rights and options. The value of equity securities varies in response to many factors, including the activities and financial condition of individual companies, the business market in which individual companies compete and general market and economic conditions. Equity securities fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be significant.

Common Stock

Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's stock price.

Preferred Stock

Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and the recovery of investment should a company be liquidated, although preferred stock is usually junior to the debt securities of the issuer. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest rates.

A fundamental risk of investing in common and preferred stock is the risk that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. Historically, common stocks have provided greater long-term returns and have entailed greater short-term risks than preferred stocks, fixed-income securities and money market investments. The market value of all securities, including common and preferred stocks, is based upon the market's perception of value and not necessarily the book value of an issuer or other objective measures of a company's worth.

Convertible Securities

Convertible securities include fixed income securities that may be exchanged or converted into a predetermined number of shares of the issuer's underlying common stock at the option of the holder during a specified period. Convertible securities may take the form of convertible preferred stock, convertible bonds or debentures, units consisting of "usable" bonds and warrants or a combination of the features of several of these securities. Convertible securities are senior to common stocks in an issuer's capital structure, but are usually subordinated to similar non-convertible securities. While providing a fixed-income stream (generally higher in yield than the income derivable from common stock but lower than that afforded by a similar nonconvertible security), a convertible security also gives an investor the opportunity, through its conversion feature, to participate in the capital appreciation of the issuing company depending upon a market price advance in the convertible security's underlying common stock.

Warrants

Warrants are options to purchase common stock at a specific price (usually at a premium above the market value of the optioned common stock at issuance) valid for a specific period of time. Warrants may have a life ranging from less than one year to twenty years, or they may be perpetual. However, most warrants have expiration dates after which they are worthless. In addition, a warrant is worthless if the market price of the common stock does not exceed the warrant's exercise price during the life of the warrant. Warrants have no voting rights, pay no dividends, and have no rights with respect to the assets of the corporation issuing them. The percentage increase or decrease in the market price of the warrant may tend to be greater than the percentage increase or decrease in the market price of the optioned common stock.

Company-Specific Risk

There is a possibility that a particular stock may lose value due to factors specific to the company itself, including deterioration of its fundamental characteristics, an occurrence of adverse events at the company, or a downturn in its business prospects.

Bonds

A bond is an interest-bearing security issued by a U.S. or non-U.S. company, or U.S. or non-U.S. governmental unit. The issuer of a bond has a contractual obligation to pay interest at a stated rate on specific dates and to repay principal (the bond's face value) periodically or on a specified maturity date. Bonds generally are used by corporations and governments to borrow money from investors.

An issuer may have the right to redeem or "call" a bond before maturity, in which case a fund may have to reinvest the proceeds at lower market rates. Similarly, a Fund may have to reinvest interest income or payments received when bonds mature, sometimes at lower market rates. Most bonds bear interest income at a "coupon" rate that is fixed for the life of the bond. The value of a fixed-rate bond usually rises when market interest rates fall, and falls when market interest rates rise. Accordingly, a fixed-rate bond's yield (income as a percent of the bond's current value) may differ from its coupon rate as its value rises or falls. When an investor purchases a fixed-rate bond at a price that is greater than its face value, the investor is purchasing the bond at a premium. Conversely, when an investor purchases a fixed-rate bond at a price that is less than its face value, the investor is purchasing the bond at a discount. Fixed-rate bonds that are purchased at a discount pay less current income than securities with comparable yields that are purchased at face value, with the result that prices for such fixed-rate securities can be more volatile than prices for such securities that are purchased at face value. Other types of

bonds bear interest at an interest rate that is adjusted periodically. Interest rates on “floating rate” or “variable rate” bonds may be higher or lower than current market rates for fixed-rate bonds of comparable quality with similar final maturities.

Because of their adjustable interest rates, the value of “floating rate” or “variable rate” bonds fluctuates much less in response to market interest rate movements than the value of fixed-rate bonds, but their value may decline if their interest rates do not rise as much, or as quickly, as interest rates in general. A Fund may treat some of these bonds as having a shorter maturity for purposes of calculating the weighted average maturity of its investment portfolio. Generally, prices of higher quality issues tend to fluctuate less with changes in market interest rates than prices of lower quality issues and prices of longer maturity issues tend to fluctuate more than prices of shorter maturity issues. Bonds may be senior or subordinated obligations. Senior obligations generally have the first claim on a corporation’s earnings and assets and, in the event of liquidation, are paid before subordinated obligations. Bonds may be unsecured (backed only by the issuer’s general creditworthiness) or secured (backed by specified collateral).

Corporate Bonds

The investment return of corporate bonds reflects interest earned on the security and changes in the market value of the security. The market value of a corporate bond may be affected by changes in the market rate of interest, the credit rating of the corporation, the corporation’s performance and perceptions of the corporation in the marketplace. There is a risk that the issuers of the securities may not be able to meet their obligations on interest or principal payments at the time called for by an instrument.

Real Estate Investment Trusts

Each Fund may invest in securities of real estate investment trusts (“REITs”). REITs are publicly traded corporations or trusts that specialize in acquiring, holding and managing residential, commercial or industrial real estate. A REIT is not taxed at the entity level on income distributed to its shareholders or unitholders if it distributes to shareholders or unitholders at least 95% of its taxable income for each taxable year and complies with regulatory requirements relating to its organization, ownership, assets and income.

REITs generally can be classified as “Equity REITs”, “Mortgage REITs” and “Hybrid REITs.” An Equity REIT invests the majority of its assets directly in real property and derives its income primarily from rents and from capital gains on real estate appreciation, which are realized through property sales. A Mortgage REIT invests the majority of its assets in real estate mortgage loans and services its income primarily from interest payments. A Hybrid REIT combines the characteristics of an Equity REIT and a Mortgage REIT. Although a Fund can invest in all three kinds of REITs, its emphasis is expected to be on investments in Equity REITs.

Investments in the real estate industry involve particular risks. The real estate industry has been subject to substantial fluctuations and declines on a local, regional and national basis in the past and may continue to be in the future. Real property values and income from real property continue to be in the future. Real property values and income from real property may decline due to general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, regulatory limitations on rents, changes in neighborhoods and in demographics, increases in market interest rates, or other factors. Factors such as these may adversely affect companies that own and operate real estate directly, companies that lend to such companies, and companies that service the real estate industry.

Investments in REITs also involve risks. Equity REITs will be affected by changes in the values of and income from the properties they own, while Mortgage REITs may be affected by the credit quality of the mortgage loans they hold. In addition, REITs are dependent on specialized management skills and on their ability to generate cash flow for operating purposes and to make distributions to shareholders or unitholders REITs may have limited diversification and are subject to risks associated with obtaining financing for real property, as well as to the risk of self-liquidation. REITs also can be adversely affected by their failure to qualify for tax-free pass-through treatment of their income under the Internal Revenue Code of 1986, as amended, or their failure to maintain an exemption from registration under the 1940 Act. By investing in REITs indirectly through a Fund, a shareholder bears not only a proportionate share of the expenses of the Fund, but also may indirectly bear similar expenses of some of the REITs in which it invests.

Certificates of Deposit and Bankers’ Acceptances

Certificates of deposit are receipts issued by a depository institution in exchange for the deposit of funds. The issuer agrees to pay the amount deposited plus interest to the bearer of the receipt on the date specified on the certificate. The certificate usually can be traded in the secondary market prior to maturity. Bankers’ acceptances typically arise from short-term credit arrangements designed to enable businesses to obtain funds to finance commercial transactions. Generally, an acceptance

is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then “accepted” by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an earning asset or it may be sold in the secondary market at the going rate of discount for a specific maturity. Although maturities for acceptances can be as long as 270 days, most acceptances have maturities of six months or less.

Commercial Paper

Commercial paper consists of short-term (usually from 1 to 270 days) unsecured promissory notes issued by corporations in order to finance their current operations. It may be secured by letters of credit, a surety bond or other forms of collateral. Commercial paper is usually repaid at maturity by the issuer from the proceeds of the issuance of new commercial paper. As a result, investment in commercial paper is subject to the risk the issuer cannot issue enough new commercial paper to satisfy its outstanding commercial paper, also known as rollover risk. Commercial paper may become illiquid or may suffer from reduced liquidity in certain circumstances. Like all fixed income securities, commercial paper prices are susceptible to fluctuations in interest rates. If interest rates rise, commercial paper prices will decline. The short-term nature of a commercial paper investment makes it less susceptible to interest rate risk than many other fixed income securities because interest rate risk typically increases as maturity lengths increase. Commercial paper tends to yield smaller returns than longer-term corporate debt because securities with shorter maturities typically have lower effective yields than those with longer maturities. As with all fixed income securities, there is a chance that the issuer will default on its commercial paper obligation.

Information on Time Deposits and Variable Rate Notes

Time deposits are issued by a depository institution in exchange for the deposit of funds. The issuer agrees to pay the amount deposited plus interest to the depositor on the date specified with respect to the deposit. Time deposits do not trade in the secondary market prior to maturity. However, some time deposits may be redeemable prior to maturity and may be subject to withdrawal penalties.

The commercial paper obligations are typically unsecured and may include variable rate notes. The nature and terms of a variable rate note (i.e., a “Master Note”) permit a Fund to invest fluctuating amounts at varying rates of interest pursuant to a direct arrangement between the Fund and the issuer. It permits daily changes in the amounts invested. Each Fund, typically, has the right at any time to increase, up to the full amount stated in the note agreement, or to decrease the amount outstanding under the note. The issuer may prepay at any time and without penalty any part of or the full amount of the note. The note may or may not be backed by one or more bank letters of credit. Because these notes are direct investment arrangements between a Fund and the issuer, it is not generally contemplated that they will be traded; moreover, there is currently no secondary market for them. Except as specifically provided in the Prospectus, there is no limitation on the type of issuer from whom these notes may be purchased; however, in connection with such purchase and on an ongoing basis, the Adviser will consider the earning power, cash flow and other liquidity ratios of the issuer, and its ability to pay principal and interest on demand, including a situation in which all holders of such notes made demand simultaneously. Variable rate notes are subject to a Fund’s investment restriction on illiquid investments unless such notes can be put back to the issuer (redeemed) on demand within seven days.

Insured Bank Obligations

The Federal Deposit Insurance Corporation (“FDIC”) insures the deposits of federally insured banks and savings and loan associations (collectively referred to as “banks”) up to \$250,000. Each Fund may elect to purchase bank obligations in small amounts so as to be fully insured as to principal by the FDIC. Currently, to remain fully insured as to principal, these investments must be limited to \$250,000 per bank; if the principal amount and accrued interest together exceed \$250,000, the excess principal and accrued interest will not be insured. Insured bank obligations may have limited marketability.

United States Government Obligations

These consist of various types of marketable securities issued by the United States Treasury, i.e., bills, notes and bonds. Such securities are direct obligations of the United States government and differ mainly in the length of their maturity. Treasury bills, the most frequently issued marketable government security, have a maturity of up to one year and are issued on a discount basis.

Debt Issued by United States Government Agencies

These consist of debt securities issued by agencies and instrumentalities of the United States government, including the various types of instruments currently outstanding or which may be offered in the future. Agencies include, among others,

the Federal Housing Administration, Government National Mortgage Association (“Ginnie Mae”), Farmer’s Home Administration, Export-Import Bank of the United States, Maritime Administration, and General Services Administration. Instrumentalities include, for example, each of the Federal Home Loan Banks, the National Bank for Cooperatives, the Federal Home Loan Mortgage Corporation (“Freddie Mac”), the Farm Credit Banks, the Federal National Mortgage Association (“Fannie Mae”), and the United States Postal Service. These securities are either: (i) backed by the full faith and credit of the United States government (e.g., United States Treasury Bills); (ii) guaranteed by the United States Treasury (e.g., Ginnie Mae mortgage-backed securities); (iii) supported by the issuing agency’s or instrumentality’s right to borrow from the United States Treasury (e.g., Fannie Mae Discount Notes); or (iv) supported only by the issuing agency’s or instrumentality’s own credit (e.g., Tennessee Valley Association).

Government-related guarantors (i.e. not backed by the full faith and credit of the United States government) include Fannie Mae and Freddie Mac. Fannie Mae is a government-sponsored corporation owned entirely by private stockholders. It is subject to general regulation by the Secretary of Housing and Urban Development. Fannie Mae purchases conventional (i.e., not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Pass-through securities issued by Fannie Mae are guaranteed as to timely payment of principal and interest by Fannie Mae but are not backed by the full faith and credit of the United States government.

Freddie Mac was created by Congress in 1970 for the purpose of increasing the availability of mortgage credit for residential housing. It is a government-sponsored corporation formerly owned by the twelve Federal Home Loan Banks and now owned entirely by private stockholders. Freddie Mac issues participation certificates (“PCs”), which represent interests in conventional mortgages from Freddie Mac’s national portfolio. Freddie Mac guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the United States Government. Commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers also create pass-through pools of conventional residential mortgage loans. Such issuers may, in addition, be the originators and/or servicers of the underlying mortgage loans as well as the guarantors of the mortgage-related securities. Pools created by such nongovernmental issuers generally offer a higher rate of interest than government and government-related pools because there are no direct or indirect government or agency guarantees of payments in the former pools. However, timely payment of interest and principal of these pools may be supported by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance and letters of credit. The insurance and guarantees are issued by governmental entities, private insurers and the mortgage poolers.

On September 7, 2008, the U.S. Treasury Department and the Federal Housing Finance Authority (the “FHFA”) announced that Fannie Mae and Freddie Mac had been placed into conservatorship, a statutory process designed to stabilize a troubled institution with the objective of returning the entity to normal business operations. The U.S. Treasury Department and the FHFA at the same time established a secured lending facility and a Secured Stock Purchase Agreement with both Fannie Mae and Freddie Mac to ensure that each entity had the ability to fulfill its financial obligations. The FHFA announced that it does not anticipate any disruption in pattern of payments or ongoing business operations of Fannie Mae or Freddie Mac.

Securities Options

Each Fund may purchase and write (i.e., sell) put and call options. Such options may relate to particular securities or stock indices, and may or may not be listed on a domestic or foreign securities exchange, and may or may not be issued by the Options Clearing Corporation. Options trading is a highly specialized activity that entails greater than ordinary investment risk. Options may be more volatile than the underlying instruments, and therefore, on a percentage basis, an investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves.

A call option for a particular security gives the purchaser of the option the right to buy, and the writer (seller) the obligation to sell, the underlying security at the stated exercise price at any time prior to the expiration of the option, regardless of the market price of the security. The premium paid to the writer is in consideration for undertaking the obligation under the option contract. A put option for a particular security gives the purchaser the right to sell the security at the stated exercise price at any time prior to the expiration date of the option, regardless of the market price of the security.

Stock index options are put options and call options on various stock indices. In most respects, they are identical to listed options on common stocks. The primary difference between stock options and index options occurs when index options are exercised. In the case of stock options, the underlying security, common stock, is delivered. However, upon the exercise of an index option, settlement does not occur by delivery of the securities comprising the index. The option holder who exercises the index option receives an amount of cash if the closing level of the stock index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the exercise price of the option. This amount of cash is equal to the difference between the closing price of the stock index and the exercise price of the option expressed in dollars times a specified multiple. A stock index fluctuates with changes in the market value of the stocks included in the

index. For example, some stock index options are based on a broad market index, such as the Standard & Poor's 500® Index or the Value Line Composite Index or a narrower market index, such as the Standard & Poor's 100®. Indices may also be based on an industry or market segment, such as the NYSE Arca Oil and Gas Index. Options on stock indices are currently traded on the Chicago Board Options Exchange, the New York Stock Exchange and the Nasdaq PHLX.

A Fund's obligation to sell an instrument subject to a call option written by it, or to purchase an instrument subject to a put option written by it, may be terminated prior to the expiration date of the option by the Fund's execution of a closing purchase transaction, which is effected by purchasing on an exchange an option of the same series (*i.e.*, same underlying instrument, exercise price and expiration date) as the option previously written. A closing purchase transaction will ordinarily be effected to realize a profit on an outstanding option, to prevent an underlying instrument from being called, to permit the sale of the underlying instrument or to permit the writing of a new option containing different terms on such underlying instrument. The cost of such a liquidation purchase plus transactions costs may be greater than the premium received upon the original option, in which event the Fund will have paid a loss in the transaction. There is no assurance that a liquid secondary market will exist for any particular option. An option writer unable to effect a closing purchase transaction will not be able to sell the underlying instrument or liquidate the assets held in a segregated account, as described below, until the option expires or the optioned instrument is delivered upon exercise. In such circumstances, the writer will be subject to the risk of market decline or appreciation in the instrument during such period.

If an option purchased by a Fund expires unexercised, the Fund realizes a loss equal to the premium paid. If the Fund enters into a closing sale transaction on an option purchased by it, the Fund realizes a gain if the premium received by the Fund on the closing transaction is more than the premium paid to purchase the option, or a loss if it is less. If an option written by a Fund expires on the stipulated expiration date or if the Fund enters into a closing purchase transaction, it realizes a gain (or loss if the cost of a closing purchase transaction exceeds the net premium received when the option is sold). If an option written by a Fund is exercised, the proceeds of the sale is increased by the net premium originally received and the Fund realizes a gain or loss.

Certain Risks Regarding Options

There are several risks associated with transactions in options. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. In addition, a liquid secondary market for particular options, whether traded over-the-counter or on an exchange, may be absent for reasons which include the following: there may be insufficient trading interest in certain options; restrictions may be imposed by an exchange on opening transactions or closing transactions or both; trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options or underlying securities or currencies; unusual or unforeseen circumstances may interrupt normal operations on an exchange; the facilities of an exchange or the Options Clearing Corporation may not at all times be adequate to handle current trading value; or one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options that had been issued by the Options Clearing Corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

Successful use by a Fund of options on stock indices is subject to the ability of the Adviser to correctly predict movements in the directions of the stock market. This requires different skills and techniques than predicting changes in the prices of individual securities. In addition, a Fund's ability to effectively hedge all or a portion of the securities in its portfolio, in anticipation of or during a market decline, through transactions in put options on stock indices, depends on the degree to which price movements in the underlying index correlate with the price movements of the securities held by the Fund. In as much as a Fund's securities does not duplicate the components of an index, the correlation is not perfect. Consequently, each Fund bears the risk that the prices of its securities being hedged will not move in the same amount as the prices of its put options on the stock indices. It is also possible that there may be a negative correlation between the index and a Fund's securities that would result in a loss on both such securities and the options on stock indices acquired by the Fund.

The hours of trading for options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that cannot be reflected in the options markets. The purchase of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The purchase of stock index options involves the risk that the premium and transaction costs paid by a Fund in purchasing an option will be lost as a result of unanticipated movements in prices of the securities comprising the stock index on which the option is based.

There is no assurance that a liquid secondary market on an options exchange will exist for any particular option, or at any particular time, and for some options no secondary market on an exchange or elsewhere may exist. If a Fund is unable to close out a call option on securities that it has written before the option is exercised, the Fund may be required to purchase the optioned securities in order to satisfy its obligation under the option to deliver such securities. If a Fund is unable to effect a closing sale transaction with respect to options on securities that it has purchased, it would have to exercise the option in order to realize any profit and would incur transaction costs upon the purchase and sale of the underlying securities.

Options on Futures Contracts

Each Fund may purchase and sell options on the same types of futures in which it may invest. Options on futures are similar to options on underlying instruments except that options on futures give the purchaser the right, in return for the premium paid, to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put), rather than to purchase or sell the futures contract, at a specified exercise price at any time during the period of the option. Upon exercise of the option, the delivery of the futures position by the writer of the option to the holder of the option is accompanied by the delivery of the accumulated balance in the writer's futures margin account which represents the amount by which the market price of the futures contract, at exercise, exceeds (in the case of a call) or is less than (in the case of a put) the exercise price of the option on the futures contract. Purchasers of options who fail to exercise their options prior to the exercise date suffer a loss of the premium paid.

Dealer Options

Each Fund may engage in transactions involving dealer options as well as exchange-traded options. Certain additional risks are specific to dealer options. While a Fund might look to a clearing corporation to exercise exchange-traded options, if the Fund were to purchase a dealer option it would need to rely on the dealer from which it purchased the option to perform if the option were exercised. Failure by the dealer to do so would result in the loss of the premium paid by the Fund as well as loss of the expected benefit of the transaction.

Exchange-traded options generally have a continuous liquid market while dealer options may not. Consequently, a Fund may generally be able to realize the value of a dealer option it has purchased only by exercising or reselling the option to the dealer who issued it. Similarly, when a Fund writes a dealer option, it may generally be able to close out the option prior to its expiration only by entering into a closing purchase transaction with the dealer to whom the Fund originally wrote the option. While each Fund seeks to enter into dealer options only with dealers who will agree to and which are expected to be capable of entering into closing transactions with the Fund, there can be no assurance that the Fund will at any time be able to liquidate a dealer option at a favorable price at any time prior to expiration. Unless the Fund, as a covered dealer call option writer, is able to effect a closing purchase transaction, it will not be able to liquidate securities (or other assets) used as cover until the option expires or is exercised. In the event of insolvency of the other party, a Fund may be unable to liquidate a dealer option. With respect to options written by a Fund, the inability to enter into a closing transaction may result in material losses to the Fund. For example, because a Fund must maintain a secured position with respect to any call option on a security it writes, the Fund may not sell the assets, which it has segregated to secure the position while it is obligated under the option. This requirement may impair a Fund's ability to sell portfolio securities at a time when such sale might be advantageous.

The Staff of the SEC has taken the position that purchased dealer options are illiquid investments. A Fund may treat the cover used for written dealer options as liquid if the dealer agrees that the Fund may repurchase the dealer option it has written for a maximum price to be calculated by a predetermined formula. In such cases, the dealer option would be considered illiquid only to the extent the maximum purchase price under the formula exceeds the intrinsic value of the option. Accordingly, each Fund will treat dealer options as subject to the Fund's limitation on illiquid securities. If the SEC changes its position on the liquidity of dealer options, each Fund will change its treatment of such instruments accordingly.

Spread Transactions

Each Fund may purchase covered spread options from securities dealers. These covered spread options are not presently exchange-listed or exchange-traded. The purchase of a spread option gives a Fund the right to put securities that it owns at a fixed dollar spread or fixed yield spread in relationship to another security that the Fund does not own, but which is used as a benchmark. The risk to a Fund, in addition to the risks of dealer options described above, is the cost of the premium paid as well as any transaction costs. The purchase of spread options will be used to protect a Fund against adverse changes in prevailing credit quality spreads, *i.e.*, the yield spread between high quality and lower quality securities. This protection is provided only during the life of the spread options.

Repurchase Agreements

Each Fund may enter into repurchase agreements. In a repurchase agreement, an investor (such as a Fund) purchases a security (known as the “underlying security”) from a securities dealer or bank. Any such dealer or bank must be deemed creditworthy by the Adviser. At that time, the bank or securities dealer agrees to repurchase the underlying security at a mutually agreed upon price on a designated future date. The repurchase price may be higher than the purchase price, the difference being income to a Fund, or the purchase and repurchase prices may be the same, with interest at an agreed upon rate due to the Fund on repurchase. In either case, the income to the Fund generally is unrelated to the interest rate on the underlying securities. Repurchase agreements must be “fully collateralized,” in that the market value of the underlying securities (including accrued interest) must at all times be equal to or greater than the repurchase price. Therefore, a repurchase agreement can be considered a loan collateralized by the underlying securities.

Repurchase agreements are generally for a short period of time, often less than a week, and is generally used by a Fund to invest excess cash or as part of a temporary defensive strategy. Repurchase agreements that do not provide for payment within seven days will be treated as illiquid investments. In the event of a bankruptcy or other default by the seller of a repurchase agreement, a Fund could experience both delays in liquidating the underlying security and losses. These losses could result from: (a) possible decline in the value of the underlying security while a Fund is seeking to enforce its rights under the repurchase agreement; (b) possible reduced levels of income or lack of access to income during this period; and (c) expenses of enforcing its rights.

Trading in Futures Contracts

A futures contract provides for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument (e.g., units of a stock index) for a specified price, date, time and place designated at the time the contract is made. Brokerage fees are paid when a futures contract is bought or sold, and margin deposits must be maintained. Entering into a contract to buy is commonly referred to as buying or purchasing a contract or holding a long position. Entering into a contract to sell is commonly referred to as selling a contract or holding a short position.

Unlike when a Fund purchases or sells a security, no price would be paid or received by the Fund upon the purchase or sale of a futures contract. The margin required for a particular futures contract is set by the exchange on which the contract is traded and may be significantly modified from time to time by the exchange during the term of the contract. Futures contracts are customarily purchased and sold on margins that may range upward from less than 5% of the value of the contract being traded.

If the price of an open futures contract changes (by increase in underlying instrument or index in the case of a sale or by decrease in the case of a purchase) so that the loss on the futures contract reaches a point at which the margin on deposit does not satisfy margin requirements, the broker will require an increase in the margin. However, if the value of a position increases because of favorable price changes in the futures contract so that the margin deposit exceeds the required margin, the broker will pay the excess to the relevant Fund.

These subsequent payments, called “variation margin,” to and from the futures broker, are made on a daily basis as the price of the underlying assets fluctuate making the long and short positions in the futures contract more or less valuable, a process known as “marking to the market.” Each Fund expects to earn interest income on margin deposits.

Although certain futures contracts, by their terms, require actual future delivery of and payment for the underlying instruments, in practice most futures contracts are usually closed out before the delivery date. Closing out an open futures contract purchase or sale is effected by entering into an offsetting futures contract sale or purchase, respectively, for the same aggregate amount of the identical underlying instrument or index and the same delivery date. If the offsetting purchase price is less than the original sale price, a Fund realizes a gain; if it is more, the Fund realizes a loss. Conversely, if the offsetting sale price is more than the original purchase price, a Fund realizes a gain; if it is less, the Fund realizes a loss. The transaction costs must also be included in these calculations. There can be no assurance, however, that a Fund will be able to enter into an offsetting transaction with respect to a particular futures contract at a particular time. If a Fund is not able to enter into an offsetting transaction, the Fund will continue to be required to maintain the margin deposits on the futures contract.

When-Issued, Forward Commitments and Delayed Settlements

Each Fund may purchase and sell securities on a when-issued, forward commitment or delayed settlement basis. In this event, the Custodian (as defined under the section entitled “Custodian”) segregates liquid assets equal to the amount of the commitment in a separate account. Normally, the Custodian sets aside portfolio securities to satisfy a purchase commitment. In such a case, a Fund may be required subsequently to segregate additional assets in order to assure that the value of the

account remains equal to the amount of the Fund's commitment. It may be expected that a Fund's net assets will fluctuate to a greater degree when it sets aside portfolio securities to cover such purchase commitments than when it sets aside cash.

The Funds do not intend to engage in these transactions for speculative purposes but only in furtherance of its investment objectives. Because each Fund segregates liquid assets to satisfy purchase commitments in the manner described, the Fund's liquidity and the ability of the Adviser to manage them may be affected in the event the Fund's forward commitments, commitments to purchase when-issued securities and delayed settlements ever exceeded 15% of the value of its net assets.

Each Fund purchases securities on a when-issued, forward commitment or delayed settlement basis only with the intention of completing the transaction. If deemed advisable as a matter of investment strategy, however, a Fund may dispose of or renegotiate a commitment after it is entered into and may sell securities it has committed to purchase before those securities are delivered to the Fund on the settlement date. In these cases, a Fund may realize a taxable capital gain or loss. When a Fund engages in when-issued, forward commitment and delayed settlement transactions, it relies on the other party to consummate the trade. Failure of such party to do so may result in the Fund incurring a loss or missing an opportunity to obtain a price credited to be advantageous.

The market value of the securities underlying a when-issued purchase, forward commitment to purchase securities, or a delayed settlement and any subsequent fluctuations in their market value is taken into account when determining the market value of a Fund starting on the day the Fund agrees to purchase the securities. A Fund does not earn interest on the securities it has committed to purchase until it has paid for and delivered on the settlement date.

Illiquid and Restricted Investments

Each Fund may invest up to 15% of its net assets in illiquid investments. Illiquid investments include securities subject to contractual or legal restrictions on resale (e.g., because they have not been registered under the Securities Act of 1933, as amended (the "Securities Act") and securities that are otherwise not readily marketable (e.g., because trading in the security is suspended or because market makers do not exist or will not entertain bids or offers). Securities that have not been registered under the Securities Act are referred to as private placements or restricted securities and are purchased directly from the issuer or in the secondary market. Foreign securities that are freely tradable in their principal markets are not considered to be illiquid.

Restricted and other illiquid investments may be subject to the potential for delays on resale and uncertainty in valuation. A Fund might be unable to dispose of illiquid securities promptly or at reasonable prices and might thereby experience difficulty in satisfying redemption requests from shareholders. The Fund might have to register restricted securities in order to dispose of them, resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities.

A large institutional market exists for certain securities that are not registered under the Securities Act, including foreign securities. The fact that there are contractual or legal restrictions on resale to the general public or to certain institutions may not be indicative of the liquidity of such investments. Rule 144A under the Securities Act allows such a broader institutional trading market for securities otherwise subject to restrictions on resale to the general public. Rule 144A establishes a "safe harbor" from the registration requirements of the Securities Act for resale of certain securities to qualified institutional buyers. Rule 144A has produced enhanced liquidity for many restricted securities, and market liquidity for such securities may continue to expand as a result of this regulation and the consequent existence of the PORTAL system, which is an automated system for the trading, clearance and settlement of unregistered securities of domestic and foreign issuers sponsored by NASDAQ.

Under guidelines adopted by the Board, the Adviser may determine that particular Rule 144A securities, and commercial paper issued in reliance on the private placement exemption from registration afforded by Section 4(a)(2) of the Securities Act, are liquid even though they are not registered. A determination of whether such a security is liquid or not is a question of fact. In making this determination, the Adviser considers, as it deems appropriate under the circumstances and among other factors: (1) the frequency of trades and quotes for the security; (2) the number of dealers willing to purchase or sell the security; (3) the number of other potential purchasers of the security; (4) dealer undertakings to make a market in the security; (5) the nature of the security (e.g., debt or equity, date of maturity, terms of dividend or interest payments, and other material terms) and the nature of the marketplace trades (e.g., the time needed to dispose of the security, the method of soliciting offers, and the mechanics of transfer); and (6) the rating of the security and the financial condition and prospects of the issuer. In the case of commercial paper, the Adviser also determines that the paper (1) is not traded flat or in default as to principal and interest, and (2) is rated in one of the two highest rating categories by at least two nationally recognized statistical rating organizations ("NRSROs") or, if only one NRSRO rates the security, by that NRSRO, or, if the security is unrated, the Adviser determines that it is of equivalent quality.

Rule 144A securities and Section 4(a)(2) commercial paper that have been deemed liquid as described above will continue to be monitored by the Adviser to determine if the security is no longer liquid as the result of changed conditions. Investing in Rule 144A securities or Section 4(a)(2) commercial paper could have the effect of increasing the amount of a Fund's assets invested in illiquid investments if institutional buyers are unwilling to purchase such securities.

Liquidity Risk Management

Rule 22e-4 under the 1940 Act (the "Liquidity Rule") requires open-end funds to establish a liquidity risk management program (the "Liquidity Program") and enhance disclosures regarding fund liquidity. As required by the Liquidity Rule, the Funds have implemented a Liquidity Program, and the Board has appointed an administrator of the Liquidity Program. Under the Liquidity Program, the Funds' liquidity risk is assessed, managed, and periodically reviewed. The Liquidity Rule defines "liquidity risk" as the risk that a Fund could not meet requests to redeem shares issued by the Fund without significant dilution of the remaining investors' interest in the Fund. The liquidity of a Fund's portfolio investments is determined based on relevant market, trading and investment-specific considerations under the Liquidity Program.

Regulation as a Commodity Pool Operator

The Adviser will file with the National Futures Association, a notice claiming an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act, as amended, and the rules of the Commodity Futures Trading Commission promulgated thereunder, with respect to a Fund's operation. Accordingly, the Funds will not be subject to registration or regulation as commodity pool operators.

Management Risk

The Funds are subject to management risk because they rely on the Adviser to achieve their investment objectives. The Funds runs the risk that the Adviser's investment techniques will fail to produce desired results and cause the Funds to incur significant losses. The Adviser also may fail to use derivatives effectively, choosing to hedge or not to hedge positions at disadvantageous times. There can be no assurance that key Adviser personnel will continue to be employed by the Adviser. The loss of their services could have an adverse impact on the Adviser's ability to achieve the Funds' investment objectives.

INVESTMENT RESTRICTIONS

Each Fund has adopted the following investment restrictions that may not be changed without approval by a "majority of the outstanding shares" of the Fund, which, as used in this SAI, means the vote of the lesser of (a) 67% or more of the shares of the Fund represented at a meeting, if the holders of more than 50% of the outstanding shares of the Fund are present or represented by proxy, or (b) more than 50% of the outstanding shares of the Fund. No Fund may:

1. Issue senior securities, except as otherwise permitted under the 1940 Act, and the rules and regulations promulgated thereunder, which allow a borrowing from a bank where the Fund maintains an asset coverage ratio of at least 300% while the borrowing is outstanding;
2. Borrow money, except (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of the Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of the Fund's total assets at the time when the borrowing is made. This limitation does not preclude the Fund from entering into reverse repurchase transactions, provided that the Fund has an asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions;
3. Purchase securities on margin, participate on a joint or joint and several basis in any securities trading account, or underwrite securities. This limitation does not preclude the Fund from obtaining such short-term credit as may be necessary for the clearance of purchases and sales of its portfolio securities, and except to the extent that the Fund may be deemed an underwriter under the Securities Act, by virtue of disposing of portfolio securities;
4. Purchase or sell real estate or interests in real estate. This limitation is not applicable to investments in marketable securities that are secured by or represent interests in real estate. This limitation does not preclude the Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including REITs);
5. Invest more than 25% of the market value of its assets in the securities of companies engaged in any one industry or group of industries. This limitation does not apply to investment in the securities of the U.S. government, its agencies or instrumentalities;
6. Purchase or sell commodities (unless acquired as a result of ownership of securities or other investments) or commodity futures contracts, except that the Fund may purchase and sell futures contracts and options to the full extent permitted under the 1940 Act, sell foreign currency contracts in accordance with any rules of the Commodity

Futures Trading Commission, invest in securities or other instruments backed by commodities, and invest in companies that are engaged in a commodities business or have a significant portion of their assets in commodities; or

7. Make loans to others, except that the Fund may, in accordance with its investment objective and policies, (i) lend portfolio securities, (ii) purchase and hold debt securities or other debt instruments, including but not limited to loan participations and sub-participations, assignments, and structured securities, (iii) make loans secured by mortgages on real property, (iv) enter into repurchase agreements, (v) enter into transactions where each loan is represented by a note executed by the borrower, and (vi) make time deposits with financial institutions and invest in instruments issued by financial institutions. For purposes of this limitation, the term “loans” shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other securities.

If a restriction on a Fund’s investments is adhered to at the time an investment is made, a subsequent change in the percentage of Fund assets invested in certain securities or other instruments of the Fund’s investment portfolio, resulting from changes in the value of the Fund’s total assets, will not be considered a violation of the restriction; provided, however, that the asset coverage requirement applicable to borrowings shall be maintained in the manner contemplated by applicable law.

With respect to Fundamental Investment Limitation #2 above, if a Fund’s asset coverage falls below 300%, the Fund will reduce borrowing within 3 days in order to ensure that the Fund has 300% asset coverage.

Although Fundamental Investment Limitation #7 reserves for a Fund the ability to make loans, there is no present intent to loan money or portfolio securities and additional disclosure will be provided if such a strategy is implemented in the future.

POLICIES AND PROCEDURES FOR DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust has adopted a policy regarding the disclosure of information about each Fund’s portfolio holdings. Each Fund and its service providers may not receive compensation or any other consideration (which includes any agreement to maintain assets in the Fund or in other investment companies or accounts managed by the Adviser or any affiliated person of the Adviser) in connection with the disclosure of portfolio holdings information of the Fund. The Trust’s policy is implemented and overseen by the Chief Compliance Officer (“CCO”) of the Trust, subject to the oversight of the Board. Periodic reports regarding these procedures will be provided to the Board. The Trust, the Adviser and the Distributor (as defined below) will not disseminate non-public information concerning the Trust. The Board must approve all material amendments to this policy.

Each business day, a Fund’s portfolio holdings information will generally be provided for dissemination through the facilities of the National Securities Clearing Corporation (“NSCC”) and/or other fee-based subscription services to NSCC members and/or subscribers to those other fee-based subscription services, including Authorized Participants (as defined below), and to entities that publish and/or analyze such information in connection with the process of purchasing or redeeming Creation Units or trading shares of the Fund in the secondary market. This information typically reflects the Fund’s anticipated holdings as of the next Business Day (as defined below).

Access to information concerning a Fund’s portfolio holdings may be permitted to personnel of third-party service providers, including the Fund’s custodian, transfer agent, auditors and counsel, as may be necessary to conduct business in the ordinary course in a manner consistent with such service providers’ agreements with the Trust on behalf of the Fund.

Portfolio holdings information made available in connection with the creation/redemption process may be provided to other entities that provide services to a Fund in the ordinary course of business after it has been disseminated to the NSCC. From time to time, information concerning portfolio holdings other than portfolio holdings information made available in connection with the creation/redemption process, as discussed above, may be provided to other entities that provide services to a Fund, including rating or ranking organizations, in the ordinary course of business, no earlier than one business day following the date of the information.

Each Fund discloses on the Adviser’s website at www.PlanRockFunds.com at the start of each Business Day the identities and quantities of the securities and other assets held by the Fund that will form the basis of the Fund’s calculation of its NAV on that Business Day. The portfolio holdings so disclosed will be based on information as of the close of business on the prior Business Day and/or trades that have been completed prior to the opening of business on that Business Day and that are expected to settle on that Business Day. A Fund may also concurrently disclose this portfolio holdings information directly to ratings agencies on a daily basis.

Quarterly Portfolio Schedule. The Trust is required to disclose, after its first and third fiscal quarters, the complete schedule of each Fund’s portfolio holdings with the SEC on Form N-PORT. The Trust will also disclose a complete schedule of the Fund’s portfolio holdings with the SEC on Form N-CSR after its second and fourth quarters.

Form N-PORT and Form N-CSR for each Fund is available on the SEC's website at www.sec.gov. Each Fund's Form N-PORT and Form N-CSR is available without charge, upon request, by calling (888) 637-7798, visiting the Adviser's web site at www.PlanRockFunds.com or by writing to the Funds, c/o Ultimus Fund Solutions, LLC, 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022-3474.

The Adviser. Personnel of the Adviser, including personnel responsible for managing each Fund's portfolio, may have full daily access to Fund portfolio holdings since that information is necessary in order for the Adviser to provide its management, administrative, and investment services to the Fund. As required for purposes of analyzing the impact of existing and future market changes on the prices, availability, as demand and liquidity of such securities, as well as for the assistance of portfolio managers in the trading of such securities, Adviser personnel may also release and discuss certain portfolio holdings with various broker-dealers.

Ultimus Fund Solutions, LLC. Ultimus Fund Solutions, LLC is the fund accountant, administrator and custody administrator for the Funds; therefore, its personnel have full daily access to the Funds' portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

Brown Brothers Harriman & Co. Brown Brothers Harriman & Co. is the custodian and transfer agent for the Funds; therefore, its personnel have full daily access to the Funds' portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

Cohen & Company, Ltd. Cohen & Company, Ltd. is the Funds' independent registered public accounting firm; therefore, its personnel have access to the Funds' portfolio holdings in connection with auditing of the Funds' annual financial statements and providing assistance and consultation in connection with SEC filings.

Thompson Hine LLP. Thompson Hine LLP is counsel to the Trust; therefore, its personnel have access to the Funds' portfolio holdings in connection with review of the Funds' annual and semi-annual shareholder reports and SEC filings.

Additions to List of Approved Recipients

The Trust's CCO is the person responsible, and whose prior approval is required, for any disclosure of the Funds' portfolio securities at any time or to any persons other than those described above. In such cases, the recipient must have a legitimate business need for the information and must be subject to a duty to keep the information confidential. There are no ongoing arrangements in place with respect to the disclosure of portfolio holdings. In no event shall the Funds, the Adviser, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Funds' portfolio holdings.

Compliance with Portfolio Holdings Disclosure Procedures

The Trust's CCO reports periodically to the Board with respect to compliance with the Funds' portfolio holdings disclosure procedures, and from time to time provides the Board any updates to the portfolio holdings disclosure policies and procedures.

There is no assurance that the Trust's policies on disclosure of portfolio holdings will protect the Funds from the potential misuse of holdings information by individuals or firms in possession of that information.

MANAGEMENT

The business of the Trust is managed under the direction of the Board in accordance with the Agreement and Declaration of Trust and the Trust's By-laws (the "Governing Documents"), which have been filed with the SEC and are available upon request. The Board consists of four (4) individuals, each of whom are not "interested persons" (as defined under the 1940 Act) of the Trust or any investment adviser to any series of the Trust ("Independent Trustees"). Pursuant to the Governing Documents, the Board shall elect officers including a President, a Secretary, a Treasurer, a Principal Executive Officer and a Principal Accounting Officer. The Board retains the power to conduct, operate and carry on the business of the Trust and has the power to incur and pay any expenses, which, in the opinion of the Board, are necessary or incidental to carry out any of the Trust's purposes. The Board, officers, employees and agents of the Trust, when acting in such capacities, shall not be subject to any personal liability except for his or her own bad faith, willful misfeasance, gross negligence or reckless disregard of his or her duties.

Board Leadership Structure

The Board is led by John V. Palancia, who has served as the Chairman of the Board (“Chairman”) since May 2014. The Board has not appointed a Lead Independent Trustee because the Chairman is an Independent Trustee. Under the Governing Documents, the Chairman is responsible for (a) presiding at Board meetings, (b) calling special meetings on an as-needed basis, and (c) executing and administering Trust policies, including (i) setting the agendas for Board meetings and (ii) providing information to the Board members in advance of each Board meeting and between Board meetings. Generally, the Trust believes it best to have a non-executive Chairman, who together with the President (principal executive officer), are seen by its shareholders, business partners and other stakeholders as providing strong leadership. The Trust believes that its Chairman, the independent chair of the Audit Committee, and, as an entity, the full Board, provide effective leadership that is in the best interests of the Trust, the Funds and each shareholder.

Board Risk Oversight

The Board is comprised entirely of Independent Trustees with an Audit Committee with a separate chair. The Board is responsible for overseeing risk management and receives compliance reports that inform its oversight of risk management from its Chief Compliance Officer at quarterly meetings and on an ad hoc basis, when and if necessary. The Audit Committee considers financial and risk reporting within its area of responsibilities. Generally, the Board believes that its oversight of material risks is adequately maintained through the compliance-reporting chain where the Chief Compliance Officer is the primary recipient and communicator of such risk-related information.

Trustee Qualifications

Generally, the Funds believe that each Trustee is competent to serve because of his or her individual overall merits including his or her: (i) experience, (ii) qualifications, (iii) attributes and (iv) skills.

Patricia Luscombe, CFA, has more than 30 years in financial advisory and valuation services. She has delivered a broad range of corporate finance advice including fairness opinions and valuations. Ms. Luscombe joined Lincoln International in 2007 as a Managing Director and co-head of Lincoln’s Valuations & Opinions Group. In this position, she assists regulated investment funds, business development companies, private equity funds and hedge funds in the valuation of illiquid securities for fair value accounting purposes. Ms. Luscombe’s clients range from closely held businesses to large, publicly-traded companies. Previously, Ms. Luscombe spent 16 years with Duff & Phelps Corporation, as a Managing Director in the firm’s valuation and financial advisory business. Prior to joining Duff & Phelps Corporation, Ms. Luscombe was an Associate at Smith Barney, a division of Citigroup Capital Markets, Inc., where she managed a variety of financial transactions, including mergers and acquisitions, leveraged buyouts, and equity and debt financings. Ms. Luscombe is a member of the Chicago Chapter of the Association for Corporate Growth, the Chartered Financial Analyst Society of Chicago and former president of the Chicago Finance Exchange. Ms. Luscombe holds a Bachelor of Arts degree in economics from Stanford University, a Masters degree in economics from the University of Chicago and a Master of Business Administration degree from the University of Chicago Booth School of Business. In addition, Ms. Luscombe is licensed under the Series 24, 79 and 63 of FINRA.

John V. Palancia has over 40 years of business experience in the financial services industry including serving as the Director of Global Futures Operations for Merrill Lynch, Pierce, Fenner & Smith, Inc. (“Merrill Lynch”). Mr. Palancia possesses an in depth understanding of broker-dealer operations from having served in various management capacities and has held industry registrations in both securities and futures. Based on his service at Merrill Lynch, he also possesses a strong understanding of risk management, balance sheet analysis, compliance and the regulatory framework under which regulated financial entities must operate. Additionally, he is well versed in the regulatory framework under which investment companies must operate based on his service as a member of three other mutual fund boards. This practical and extensive experience in the securities industry provides valuable insight into fund operations and enhances his ability to effectively serve as chairman of the Board. Mr. Palancia is a member of the Investment Company Institute and Mutual Fund Directors Forum. Mr. Palancia holds a Bachelor of Science degree in Economics.

Mark H. Taylor has over 30 years of academic and professional experience in the accounting and auditing fields, which makes him particularly qualified to chair the Board’s Audit Committee. Dr. Taylor holds PhD, Master’s and Bachelors degrees in Accountancy and is a licensed Certified Public Accountant and serves as a member of two other mutual fund boards within the Northern Lights Fund Complex. Dr. Taylor is the Director of the Lynn Pippenger School of Accountancy at the Muma College of Business at the University of South Florida and has been serving a three-year term as President of the American Accounting Association (AAA) since August 2022 (as President-Elect 8/22-7/23, President 8/23-8/24, and Past President 8/24-8/25). Dr. Taylor previously served as Vice President-Finance of the AAA, and as President of the Auditing Section of the AAA. He previously served a three-year term on the AICPA’s Auditing Standards Board and completed a fellowship in the Professional Practice Group of the Office of the Chief Accountant at the headquarters of

the United States Securities Exchange Commission. Dr. Taylor is a member of two research teams that received grants from the Center for Audit Quality to study how accounting firms' tone-at-the-top messaging impacts audit performance and how auditors manage the process of auditing fair value measurements and other complex estimates in financial statements. Dr. Taylor has had his research widely published in leading academic accounting and practice journals. He has teaching interests in corporate governance and accounting policy as well as auditing and assurance services at the graduate and undergraduate levels and possesses a strong understanding of the regulatory framework under which investment companies operate.

Jeffery D. Young has over 40 years of business management experience, including in the transportation industry and operations and information technologies. He is currently Co-owner and Vice President of the Latin America Agriculture Development Corporation, an agribusiness exporting fruit to the United States and other Central American countries. He has served as Assistant Vice President of Transportation Systems at Union Pacific Railroad Company, where he was responsible for the development and implementation of large-scale command and control systems that support railroad operations and safety. In this position, Mr. Young was heavily involved in the regulatory compliance of safety and mission critical systems. Mr. Young also served as Chairman of the Association of American Railroads Policy Committee and represented both Union Pacific Railroad and the railroad industry in safety and regulatory hearings with the National Transportation Safety Board and the Federal Railroad Administration in Washington, DC. Mr. Young was a member of the Board of Directors of PS Technologies, a Union Pacific affiliate serving as a technology supplier to the railroad industry. His practical business experience and understanding of regulatory compliance provides a different perspective that brings diversity to Board deliberations.

Trustees and Officers. The Trustees and officers of the Trust, together with information as to their principal business occupations during the past five years and other information, are shown below. Unless otherwise noted, the address of each Trustee and officer is 225 Pictoria Drive, Suite 450, Cincinnati, OH 45246.

Independent Trustees					
Name, Address, Year of Birth	Position(s) Held with Registrant	Length of Service and Term	Principal Occupation(s) During Past 5 Years	Number of Funds Overseen In The Fund Complex*	Other Directorships Held During Past 5 Years**

Joseph Kulbacki 1967	Secretary	Since November 2024, indefinite	Senior Legal Administrator, Ultimus Fund Solutions, LLC (since 2024); Senior Paralegal, Voya Financial, Inc., (2023-2024), Senior Corporate Paralegal, Argo AI (2022); Contract Paralegal (2020-2022); Corporate Governance Paralegal, GNC (2019-2020).
William Kimme 1962	Chief Compliance Officer	Since February 2012, indefinite	Senior Compliance Officer of Northern Lights Compliance Services, LLC (since 2011).

Board Committees

Audit Committee. The Board has an Audit Committee that consists solely of Independent Trustees. The Audit Committee's responsibilities include: (i) recommending to the Board the selection, retention or termination of the Trust's independent auditors; (ii) reviewing with the independent auditors the scope, performance and anticipated cost of their audit; (iii) discussing with the independent auditors certain matters relating to the Trust's financial statements, including any adjustment to such financial statements recommended by such independent auditors, or any other results of any audit; (iv) reviewing on a periodic basis a formal written statement from the independent auditors with respect to their independence, discussing with the independent auditors any relationships or services disclosed in the statement that may impact the objectivity and independence of the Trust's independent auditors and recommending that the Board take appropriate action in response thereto to satisfy itself of the auditor's independence; and (v) considering the comments of the independent auditors and management's responses thereto with respect to the quality and adequacy of the Trust's accounting and financial reporting policies and practices and internal controls. The Audit Committee operates pursuant to an Audit Committee Charter. Dr. Taylor is Chairman of the Audit Committee. During the past fiscal year, the Audit Committee held six meetings.

Compensation of Trustees

Effective January 1, 2024, each Trustee (none of whom are affiliated with the Trust or an investment adviser to any series of the Trust) receives a quarterly fee of \$30,000, allocated among each of the various portfolios comprising the Trust, for his or her attendance at the regularly scheduled meetings of the Board, to be paid in advance of each calendar quarter, as well as reimbursement for any reasonable expenses incurred. In addition to their quarterly fees and reimbursements, the Chairman of the Board receives a quarterly fee of \$7,500, and the Audit Committee Chairman receives a quarterly fee of \$5,500. From January 1, 2022 through December 31, 2023, each Trustee received a quarterly fee of \$26,000, allocated among each of the various portfolios comprising the Trust, for his or her attendance at the regularly scheduled meetings of the Board, paid in advance of each calendar quarter, as well as reimbursement for any reasonable expenses incurred. From January 1, 2022 through December 31, 2023, in addition to the quarterly fees and reimbursements, the Chairman of the Board received a quarterly fee of \$6,250, and the Audit Committee Chairman received a quarterly fee of \$4,500.

Additionally, in the event an in-person meeting of the Board other than its regularly scheduled meetings (a "Special Meeting") is required, each Independent Trustee will receive a fee of \$2,500 per Special Meeting, as well as reimbursement for any reasonable expenses incurred, to be paid by the relevant series of the Trust or its investment adviser depending on the circumstances necessitating the Special Meeting. None of the executive officers receive compensation from the Trust.

The table below details the amount of compensation the Trustees expected from the Fund Complex during the initial fiscal period ended September 30, 2024. Each Trustee is expected to attend all quarterly meetings during the period. The Trust does not have a bonus, profit sharing, pension or retirement plan.

Name and Position	PlanRock Alternative Growth ETF	PlanRock Market Neutral Income ETF	Pension or Retirement Benefits Accrued as Part of Funds Expenses	Estimated Annual Benefits Upon Retirement	Estimated Total Compensation From Fund Complex* Paid to Trustees
Patricia Luscombe	\$3,731.03	\$3,729.39	None	None	\$7,460.43
John V. Palancia	\$4,542.13	\$4,540.13	None	None	\$9,082.26
Mark H. Taylor	\$4,217.69	\$4,215.84	None	None	\$8,433.53
Jeffery D. Young	\$3,731.03	\$3,729.39	None	None	\$7,460.43

* There are currently numerous series comprising the Trust. The term "Fund Complex" refers only to the funds managed by the Adviser and not to any other series of the Trust. For the fiscal year ended September 30, 2024, the aggregate Independent Trustees' fees paid by the entire Trust were \$513,750.

Management and Trustee Ownership

As of December 31, 2024, the Trustees beneficially owned the following amounts in the Funds:

Name of Trustee	Dollar Range of Equity Securities in the Funds	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies*
Patricia Luscombe	None	\$10,001-\$50,000
John V. Palancia	None	\$10,001-\$50,000
Mark H. Taylor	None	\$10,001-\$50,000
Jeffery D. Young	None	None

CONTROL PERSONS AND PRINCIPAL HOLDERS

A principal shareholder is any person who owns (either of record or beneficially) 5% or more of the outstanding shares of a fund. A control person is one who owns, either directly or indirectly more than 25% of the voting securities of a company or acknowledges the existence of control. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledged the existence of control.

As of the date of this SAI, no shareholders of record owned 5% or more of the outstanding Shares of the PlanRock Growth Rotation ETF or the PlanRock Income Rotation ETF as these funds had not yet commenced operations. Although the Trust generally does not have information concerning the beneficial ownership of Shares nominally held by Depository Trust Company (“DTC”), the following persons or “groups” (as that term is used in Section 13(d) of the Securities Exchange Act of 1934, as amended (the “1934 Act”)) are DTC members reflecting ownership of 5% or more of the Funds’ outstanding shares as of January 2, 2025:

Title of Fund/Class	Account Name	Percentage Held of Record
PlanRock Alternative Growth ETF	CHARLES SCHWAB & CO 211 MAIN ST SAN FRANCISCO, CA 94105	97.07%

Title of Fund/Class	Account Name	Percentage Held of Record
PlanRock Market Neutral Income ETF	CHARLES SCHWAB & CO 211 MAIN ST SAN FRANCISCO, CA 94105	80.12%
	BROWN BROTHERS HARRIMAN & Co. 50 POST OFFICE SQUARE BOSTON, MA 02110-1548	16.19%

Management Ownership Information.

As of January 2, 2025, the Trustees and officers of the Trust, as a group, beneficially owned less than 1% of the outstanding shares of the Funds.

INVESTMENT ADVISER

Investment Adviser and Advisory Agreement

PlanRock Investment Management LLC, 7105 Peach Court, Suite 106, Brentwood, TN 37027, serves as the Funds’ investment adviser. The Adviser is registered with the SEC as an investment adviser under the Investment Advisers Act of 1940, as amended. Subject to the oversight of the Board, the Adviser is responsible for the overall management of the Funds’ investment-related business affairs. Pursuant to an investment advisory agreement (the “Advisory Agreement”) with the Trust, on behalf of the Funds, the Adviser, subject to the supervision of the Board, and in conformity with the stated policies of the Funds, manages the portfolio investment operations of the Funds. The Adviser has overall supervisory responsibilities for the general management and investment of the Funds’ securities portfolios, as detailed below, which are subject to review and approval by the Board. In general, the Adviser’s duties include setting the Funds’ overall investment strategies and asset allocation. The Adviser manages mutual funds and ETFs and had approximately \$58 million in assets under management as of September 30, 2024.

Pursuant to the Advisory Agreement, the Adviser, under the oversight of the Board, agrees to invest the assets of the Funds in accordance with applicable law and the investment objective, policies and restrictions set forth in the Funds’ current Prospectus and Statement of Additional Information, and subject to such further limitations as the Trust may from time to time impose by written notice to the Adviser. The Adviser acts as the investment adviser to the Funds and, as such (i) obtains and evaluate such information relating to the economy, industries, business, securities markets and securities as it may deem necessary or useful in discharging its responsibilities here under, (ii) formulates a continuing program for the investment of the assets of the Funds in a manner consistent with its investment objective, policies and restrictions, and (iii) determines from time to time securities to be purchased, sold, retained or lent by the Fund, and implement those decisions, including the selection of entities with or through which such purchases, sales or loans are to be effected; provided, that the Adviser or its designee, directly, will place orders pursuant to its investment determinations either directly with the issuer or with a broker or dealer, and if with a broker or dealer, (a) will attempt to obtain the best price and execution of its orders, and (b) may nevertheless in its discretion purchase and sell portfolio securities from and to brokers who provide the Adviser with research, analysis, advice and similar services and pay such brokers in return a higher commission or spread than may be charged by other brokers. The Adviser also provides the Funds with all necessary office facilities and personnel for

servicing the Funds' investments and compensates all personnel of the Funds or the Adviser performing services relating to research, statistical and investment activities.

In addition, the Adviser, subject to the oversight of the Board, provides the management and supplemental administrative services necessary for the operation of the Funds. These services include providing assistance supervising relations with custodians, transfer and pricing agents, accountants, underwriters and other persons dealing with the Funds; assisting in the preparing of all general shareholder communications and conducting shareholder relations; assisting in maintaining the Funds' records and the registration of the Shares under federal securities laws and making necessary filings under state securities laws; assisting in developing management and shareholder services for the Fund; and furnishing reports, evaluations and analyses on a variety of subjects to the Trustees.

The Adviser receives an annual management fee (computed daily and payable monthly) from each Fund as a percentage of the Fund's average daily net assets pursuant to the Advisory Agreement:

<i>Fund</i>	<i>Management Fee</i>
PlanRock Alternative Growth ETF	1.20%
PlanRock Market Neutral Income ETF	0.90%

The Adviser has contractually agreed to waive its fees and reimburse expenses of each Fund, until at least February 1, 2026 to ensure that total annual fund operating expenses after fee waiver and/or reimbursement (excluding (i) any front-end or contingent deferred loads; (ii) brokerage fees and commissions; (iii) acquired fund fees and expenses; (iv) fees and expenses associated with investments in other collective investment vehicles or derivative instruments (including for example option and swap fees and expenses); (v) borrowing costs (such as interest and dividend expense on securities sold short); (vi) taxes; and (vii) extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers (other than the Adviser))) will not exceed the limits set forth below of the Funds' net assets.

<i>Fund</i>	<i>Expense Limitation</i>
PlanRock Alternative Growth ETF	1.25%
PlanRock Market Neutral Income ETF	0.95%

Each Fund may recoup its fee waiver and expense reimbursement within the three years after the fees have been waived or reimbursed, if such recoupment can be achieved within the lesser of the foregoing expense limits in place at the time of recapture.

Expenses not expressly assumed by the Adviser under the Advisory Agreement are paid by the Funds. Under the terms of the Advisory Agreement, the Funds are responsible for the payment of the following expenses among others: (a) the fees payable to the Adviser, (b) the fees and expenses of Trustees who are not affiliated persons of the Adviser or the Funds' distributor, (c) the fees and certain expenses of the custodian and transfer and dividend disbursing agent, including the cost of maintaining certain required records of the Funds and of pricing the Shares, (d) the charges and expenses of legal counsel and independent accountants for the Funds, (e) brokerage commissions and any issue or transfer taxes chargeable to the Funds in connection with its securities transactions, (f) all taxes and corporate fees payable by the Funds to governmental agencies, (g) the fees of any trade association of which the Funds may be members, (h) the cost of fidelity and liability insurance, (i) the fees and expenses involved in registering and maintaining registration of the Funds and of shares with the SEC, qualifying its shares under state securities laws, including the preparation and printing of the Funds' registration statements and prospectuses for such purposes, (j) all expenses of shareholders and Board meetings (including travel expenses of Trustees and Officers of the Trust who are not directors, officers or employees of the Adviser) and of preparing, printing and mailing reports, proxy statements and prospectuses to shareholders in the amount necessary for distribution to the shareholders and (k) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Funds' business.

The Advisory Agreement shall continue in effect for two (2) years initially and thereafter shall continue from year to year provided such continuance is approved at least annually by (a) a vote of the majority of the Independent Trustees, cast in person at a meeting specifically called for the purpose of voting on such approval and by (b) the majority vote of either all of the Trustees or the vote of a majority of the outstanding shares of each Fund. The Advisory Agreement may be terminated without penalty on 60 days' written notice by a vote of a majority of the Trustees or by the Adviser, or by holders of a majority of a Fund's outstanding shares (with respect to the Fund). The Advisory Agreement shall terminate automatically in the event of its assignment. The Advisory Agreement was approved by the Board at a meeting held on November 21, 2023.

The table below provides information about the advisory fees paid to the Adviser by each Fund for the fiscal year ended September 30, 2024.

Fund	Management Fee	Fees Earned by the Adviser	Advisory Fees Waived	Net Fees Earned by the Adviser	Fund Expenses Reimbursed by the Adviser	Amount Subject to Recapture
PlanRock Alternative Growth ETF	1.20%	\$56,527	\$56,527	\$0	\$122,454	\$178,981
PlanRock Market Neutral Income ETF	0.90%	\$15,991	\$15,991	\$0	\$150,647	\$166,638

Codes of Ethics

The Trust, the Adviser and the Distributor have each adopted codes of ethics (each a “Code”) under Rule 17j-1 under the 1940 Act that governs the personal securities transactions of their board members, officers and employees who may have access to current trading information of the Trust.

In addition, the Trust has adopted a code of ethics (the “Trust Code”), which applies only to the Trust’s executive officers to ensure that these officers promote professional conduct in the practice of corporate governance and management. The purpose behind these guidelines is to promote (i) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships; (ii) full, fair, accurate, timely, and understandable disclosure in reports and documents that the Trust files with, or submits to, the SEC and in other public communications made by the Fund; (iii) compliance with applicable governmental laws, rule and regulations; (iv) the prompt internal reporting of violations of the Trust Code to an appropriate person or persons identified in the Trust Code; and (v) accountability for adherence to the Trust Code.

Proxy Voting Policies

The Board has adopted Proxy Voting Policies and Procedures (“Policies”) on behalf of the Trust, which delegate the responsibility for voting proxies to the Adviser or its designee, subject to the Board’s continuing oversight. The Policies require that the Adviser or its designee vote proxies received in a manner consistent with the best interests of the relevant Fund and its shareholders. The Policies also require the Adviser or its designee to present to the Board, at least annually, the Adviser’s Proxy Policies, or the proxy policies of the Adviser’s designee, and a record of each proxy voted by the Adviser or its designee on behalf of a Fund, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest.

Where a proxy proposal raises a material conflict between the Adviser’s interests and a Fund’s interests, the Adviser will resolve the conflict by voting in accordance with the policy guidelines or at the client’s directive using the recommendation of an independent third party. If the third party’s recommendations are not received in a timely fashion, the Adviser will abstain from voting the securities held by that client’s account. A copy of the Adviser’s proxy voting policies is attached hereto as Appendix A.

More information. Information regarding how each Fund voted proxies relating to portfolio securities held by the Fund during the most recent 12-month period ending June 30 is available (1) without charge, upon request, by calling the Funds at 800-677-6025; and (2) on the SEC’s website at <http://www.sec.gov>. In addition, a copy of the Funds’ proxy voting policies and procedures are also available by calling 800-677-6025 and will be sent within three business days of receipt of a request.

THE DISTRIBUTOR

Northern Lights Distributors, LLC (the “Distributor”) located at 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022 (the “Distributor”), serves as the principal underwriter and national distributor for the shares of the Fund pursuant to an ETF Distribution Agreement with the Trust (the “Distribution Agreement”). The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934 and each state’s securities laws and is a member of FINRA. The offerings of the Shares are continuous and the Distributor acts as an agent for the Trust. The Distributor will deliver a Prospectus to persons purchasing Shares in Creation Units and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor has no role in determining the investments or investment policies of the Fund.

The Distribution Agreement shall continue in effect for two years initially and thereafter shall continue from year to year, subject to annual approval by (a) the Board or a vote of a majority of the outstanding shares, and (b) by a majority of the Trustees who are not parties to the Distribution Agreement or the Trust’s distribution plan or interested persons of the Trust or of the Distributor (“Independent Trustees”) by vote cast in person at a meeting called for the purpose of voting on such approval.

The Distribution Agreement may at any time be terminated, without penalty by the Trust, by vote of a majority of the Independent Trustees or by vote of a majority of the outstanding shares of the Trust on 60 days’ written notice to the other party. The Distribution Agreement will automatically terminate in the event of its assignment.

The Fund does not pay the Distributor any fees under the Distribution Agreement. However, the Adviser pays an annual fee to the Distributor plus reasonable out-of-pocket expenses incurred by Distributor in connection with activities performed for the Fund, including, without limitation, printing and distribution of prospectuses and shareholder reports, out of its own resources.

Rule 12b-1 Plans

The Trust, with respect to each Fund, has adopted the Trust’s ETF Distribution Plan Pursuant to Rule 12b-1 pursuant to Rule 12b-1 under the 1940 Act (the “Plan”) for Shares pursuant to which the Fund is authorized to pay the Distributor, as compensation for Distributor’s account maintenance services under the Plan. The Board has approved a distribution and shareholder servicing fee at the rate of up to 0.25% of each Fund’s average daily net assets. Such fees are to be paid by each Fund monthly, or at such other intervals as the Board shall determine. Such fees shall be based upon each Fund’s average daily net assets during the preceding month and shall be calculated and accrued daily. Each Fund may pay fees to the Distributor at a lesser rate, as agreed upon by the Board and the Distributor. The Plan authorizes payments to the Distributor as compensation for providing account maintenance services to Fund shareholders, including arranging for certain securities dealers or brokers, administrators and others (“Recipients”) to provide these services and paying compensation for these services. Each Fund bears its own costs of distribution with respect to its shares. The Plan was adopted in order to permit the implementation of each Fund’s method of distribution. No fees are currently paid by any Fund under the Plan, and there are no current plans to impose such fees. In the event such fees were to be charged, over time they would increase the cost of an investment in that Fund.

The services to be provided to a Fund by Recipients may include, but are not limited to, the following: assistance in the offering and sale of Fund shares and in other aspects of the marketing of the shares to clients or prospective clients of the respective recipients; answering routine inquiries concerning the Fund; assisting in the establishment and maintenance of accounts or sub-accounts in a Fund and in processing purchase and redemption transactions; making the Fund’s investment plan and shareholder services available; and providing such other information and services to investors in shares of the Fund as the Distributor or the Trust, on behalf of the Fund, may reasonably request. The distribution services shall also include any advertising and marketing services provided by or arranged by the Distributor with respect to the Fund.

The Distributor is required to provide a written report, at least quarterly to the Board, specifying in reasonable detail the amounts expended pursuant to the Plan and the purposes for which such expenditures were made. Further, the Distributor informs the Board of any Rule 12b-1 fees to be paid by the Distributor to Recipients.

The Plan may not be amended to increase materially the amount of the Distributor’s compensation to be paid by a Fund, unless such amendment is approved by the vote of a majority of the outstanding voting securities of the Fund (as defined in the 1940 Act). All material amendments must be approved by a majority of the Board by votes cast in person at a meeting called for the purpose of voting on the Plan. During the term of the Plan, the selection and nomination of Independent Trustees is committed to the discretion of the current Independent Trustees. The Distributor will preserve copies of the Plan, any related agreements, and all reports, for a period of not less than six years from the date of such document and for at least the first two years in an easily accessible place.

Any agreement related to the Plan will be in writing and provide that: (a) it may be terminated by the Trust or the relevant Fund at any time upon sixty days written notice, without the payment of any penalty, by vote of a majority of the Board, or by vote of a majority of the outstanding voting securities of the Trust or the Fund; (b) it will automatically terminate in the event of its assignment (as defined in the 1940 Act); and (c) it will continue in effect for a period of more than one year from the date of its execution or adoption only so long as such continuance is specifically approved at least annually by a majority of the Board by votes cast in person at a meeting called for the purpose of voting on such agreement.

PORTFOLIO MANAGER

Stephen Hammers, Alex Pazdan and Dan Banaszak serve as portfolio managers for each Fund.

As of September 30, 2024, the portfolio managers are responsible for the portfolio management of the following types of accounts in addition to the Funds:

Stephen Hammers

Total Other Accounts By Type	Total Number of Accounts by Account Type	Total Assets By Account Type (in millions)	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee (in millions)
Registered Investment Companies	None	\$0	None	\$0
Other Pooled Investment Vehicles	None	\$0	None	\$0
Other Accounts	115	\$48,360,000	None	\$0

Alex Pazdan

Conflicts of Interest

As a general matter, certain conflicts of interest may arise in connection with the portfolio managers' management of the Funds' investments, on the one hand, and the investments of other accounts for which the portfolio managers are responsible, on the other. For example, it is possible that the various accounts managed could have different investment strategies that, at times, might conflict with one another to the possible detriment of the Funds. Alternatively, to the extent that the same investment opportunities might be desirable for more than one account, possible conflicts could arise in determining how to allocate them. Other potential conflicts might include conflicts created by the portfolio managers' compensation arrangements, and conflicts relating to selection of brokers or dealers to execute a Fund's portfolio trades and/or specific uses of commissions from a Fund's portfolio trades (for example, research, or "soft dollars", if any). The Adviser has adopted policies and procedures and has structured the portfolio managers' compensation in a manner reasonably designed to safeguard the Funds from being negatively affected as a result of any such potential conflicts.

Compensation

Each portfolio manager is paid a base salary based on the size and growth of the Funds. Profits of the Adviser are only shared according to the ownership of the Adviser.

Ownership of Securities

As of September 30, 2024, the portfolio managers beneficially owned the following amounts in the Funds:

Name of Portfolio Manager	Dollar Range of Equity Securities in PlanRock Market Neutral Income ETF	Dollar Range of Equity Securities in PlanRock Alternative Growth ETF
Stephen Hammers	Over \$1 million	Over \$1 million
Alex Pazdan	\$10,001-\$50,000	\$50,001-\$100,000
Dan Banaszak	\$10,001-\$50,000	\$10,001-\$50,000

ALLOCATION OF PORTFOLIO BROKERAGE

Specific decisions to purchase or sell securities for the Funds are made by the portfolio managers who are employees of the Adviser. The Adviser is authorized by the Board to allocate the orders placed on behalf of the Funds to brokers or dealers who may, but need not, provide research or statistical material or other services to the Funds or the Adviser for the Funds' use. Such allocation is to be in such amounts and proportions as the Adviser may determine.

In selecting a broker or dealer to execute each particular transaction, the Adviser takes the following into consideration:

- the best net price available;
- the reliability, integrity and financial condition of the broker or dealer;
- the size of and difficulty in executing the order; and
- the value of the expected contribution of the broker or dealer to the investment performance of the Fund on a continuing basis.

Brokers or dealers executing a portfolio transaction on behalf of the Funds may receive a commission in excess of the amount of commission another broker or dealer would have charged for executing the transaction if the Adviser determines in good faith that such commission is reasonable in relation to the value of brokerage and research services provided to the Funds. In allocating portfolio brokerage, the Adviser may select brokers or dealers who also provide brokerage, research and other services to other accounts over which the Adviser exercises investment discretion. Some of the services received as the result of Fund transactions may primarily benefit accounts other than the Funds, while services received as the result of portfolio transactions effected on behalf of those other accounts may primarily benefit

the Funds. For the fiscal year ended September 30, 2024, the PlanRock Alternative Growth ETF and PlanRock Market Neutral Income ETF paid \$7,549 and \$859, respectively, in brokerage commissions.

PORTFOLIO TURNOVER

Each Fund's portfolio turnover rate is calculated by dividing the lesser of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the fiscal year. The calculation excludes from both the numerator and the denominator securities with maturities at the time of acquisition of one year or less. High portfolio turnover involves correspondingly greater brokerage commissions and other transaction costs, which will be borne directly by the relevant Fund. A 100% turnover rate would occur if all of a Fund's portfolio securities were replaced once within a one-year period. During the fiscal year ended September 30, 2024, the PlanRock Alternative Growth ETF and PlanRock Market Neutral Income ETF's portfolio turnover rates were 170% and 49% of the average value of each portfolio, respectively.

OTHER SERVICE PROVIDERS

Fund Administration and Fund Accounting

Ultimus Fund Solutions, LLC, (the "Administrator"), which has its principal office at 225 Pictoria Drive, Suite 450, Cincinnati, OH 45246, and is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds.

Pursuant to an ETF Fund Services Agreement with the Funds, the Administrator provides administrative services to the Funds, subject to the supervision of the Board. The Administrator may provide persons to serve as officers of the Funds. Such officers may be directors, officers or employees of the Administrator or its affiliates.

The ETF Fund Services Agreement became effective on October 20, 2021, remained in effect for two years from the effective date, and will continue thereafter in effect for successive twelve month periods provided that such continuance is specifically approved at least annually by a majority of the Board. The agreement is terminable by the Board or the Administrator on ninety days' written notice and may be assigned provided the non-assigning party provides prior written consent. This agreement provides that in the absence of willful misfeasance, bad faith or gross negligence on the part of the Administrator or reckless disregard of its obligations thereunder, the Administrator shall not be liable for any action or failure to act in accordance with its duties thereunder.

Under the ETF Fund Services Agreement, the Administrator provides facilitating administrative services, including: (i) providing services of persons competent to perform such administrative and clerical functions as are necessary to provide effective administration of the Funds; (ii) facilitating the performance of administrative and professional services to the Funds by others, including the Custodian; (iii) preparing, but not paying for, the periodic updating of the Funds' Registration Statement, Prospectuses and Statements of Additional Information in conjunction with Fund counsel, including the printing of such documents for the purpose of filings with the SEC and state securities administrators, and preparing reports to the Funds' shareholders and the SEC; (iv) preparing in conjunction with Trust counsel, but not paying for, all filings under the securities or "Blue Sky" laws of such states or countries as are designated by the Distributor, which may be required to register or qualify, or continue the registration or qualification, of the Funds and/or Shares under such laws; (v) preparing notices and agendas for meetings of the Board and minutes of such meetings in all matters required by the 1940 Act to be acted upon by the Board; and (vi) monitoring daily and periodic compliance with respect to all requirements and restrictions of the 1940 Act, the Internal Revenue Code and the Prospectus.

The Administrator also provides the Funds with accounting services, including: (i) daily computation of NAV; (ii) maintenance of security ledgers and books and records as required by the 1940 Act; (iii) production of each Fund's listing of portfolio securities and general ledger reports; (iv) reconciliation of accounting records; (v) calculation of yield and total return for each Fund; (vi) maintenance of certain books and records described in Rule 31a-1 under the 1940 Act, and reconciliation of account information and balances among the Custodian and Adviser; and (vii) monitoring and evaluation of daily income and expense accruals, and sales and redemptions of shares of the Funds.

For administrative services rendered to the Funds under the agreement, the Administrator receives the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. For the fund accounting services rendered to the Funds under the Agreement, the Administrator receives the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. The Administrator also receives reimbursement for any out-of-pocket expenses. These amounts are paid by the Adviser on behalf of the Funds.

Transfer Agent

Brown Brothers Harriman & Co., located at 50 Post Office Square, Boston, MA 02110, acts as transfer, dividend disbursing, and shareholder servicing agent for the Funds pursuant to written agreement with Funds (the “Transfer Agent”). Under the agreement, the Transfer Agent is responsible for administering and performing transfer agent functions, dividend distribution, shareholder administration, and maintaining necessary records in accordance with applicable rules and regulations.

For the fiscal year ended September 30, 2024, the Funds incurred the following fees:

FUND	ADMINISTRATION	FUND ACCOUNTING	TRANSFER AGENT
PlanRock Alternative Growth ETF	\$42,990	\$27,801	\$7,331
PlanRock Market Neutral Income ETF	\$35,990	\$27,801	\$7,331

Custodian

Brown Brothers Harriman & Co., located at 50 Post Office Square, Boston, MA 02110 (the “Custodian”), serves as the custodian of the Funds’ assets pursuant to a Custodian and Transfer Agent Agreement by and between the Custodian and the Trust on behalf of the Funds. The Custodian’s responsibilities include safeguarding and controlling the Funds’ cash and securities, handling the receipt and delivery of securities, and collecting interest and dividends on the Funds’ investments. Pursuant to the Custodian and Transfer Agent Agreement, the Custodian also maintains original entry documents and books of record and general ledgers; posts cash receipts and disbursements; and records purchases and sales based upon communications from the Adviser. The Funds may employ foreign sub-custodians that are approved by the Board to hold foreign assets.

Compliance Officer

Northern Lights Compliance Services, LLC (“NLCS”), 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022-3474, an affiliate of the Administrator, provides a CCO to the Trust as well as related compliance services pursuant to a consulting agreement between NLCS and the Trust. NLCS’s compliance services consist primarily of reviewing and assessing the policies and procedures of the Trust and its service providers pertaining to compliance with applicable federal securities laws, including Rule 38a-1 under the 1940 Act. For the compliance services rendered to the Funds, NLCS receives a one-time fee plus an annual asset-based fee, which scales downward based upon net assets. NLCS also receives reimbursement for any out-of-pocket expenses. For the fiscal year ended September 30, 2024, the PlanRock Alternative Growth ETF and the PlanRock Market Neutral Income Fund incurred fees of \$18,995 and \$11,995, respectively, for compliance services.

DESCRIPTION OF SHARES

Each share of beneficial interest of the Trust has one vote in the election of Trustees. Cumulative voting is not authorized for the Trust. This means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees if they choose to do so, and, in that event, the holders of the remaining shares will be unable to elect any Trustees.

Shareholders of the current series of the Trust and any other future series of the Trust will vote in the aggregate and not by series except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interest of the shareholders of a particular series or classes. Matters such as election of Trustees are not subject to separate voting requirements and may be acted upon by shareholders of the Trust voting without regard to series.

The Trust is authorized to issue an unlimited number of shares of beneficial interest. Each share has equal dividend, distribution and liquidation rights. There are no conversion or preemptive rights applicable to any shares of the Fund. All shares issued are fully paid and non-assessable.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the “Program”) as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (“USA PATRIOT Act”). To ensure compliance with this law, the Trust’s Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. The Trust’s secretary serves as its Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to, determining that the Fund’s Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity and a providing a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

PURCHASE, REDEMPTION AND PRICING OF SHARES

Calculation of Share Price

As indicated in the Prospectus under the heading “How Shares are Priced,” NAV of each Fund’s shares is determined by dividing the total value of the Fund’s portfolio investments and other assets, less any liabilities, by the total number of shares outstanding of the Fund.

Generally, a Fund’s domestic securities (including underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges) are valued each day at the last quoted sales price on each security’s primary exchange. Securities traded or dealt in upon one or more securities exchanges for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the NASDAQ National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market.

Certain securities or investments for which daily market quotes are not readily available may be valued, pursuant to guidelines established by the Board, with reference to other securities or indices. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity. Short-term investments having a maturity of 60 days or less may be generally valued at amortized cost when it approximated fair value.

Exchange traded options are valued at the last quoted sales price or, in the absence of a sale, at the mean between the current bid and ask prices on the exchange on which such options are traded. Futures and options on futures are valued at the settlement price determined by the exchange, or, if no settlement price is available, at the last sale price as of the close of business prior to when the Fund calculate NAV. Other securities for which market quotes are not readily available are valued at fair value as determined in good faith by the Board or persons acting at their direction. Swap agreements and other derivatives are generally valued daily depending on the type of instrument and reference assets based upon market prices, the mean between bid and asked prices quotations from market makers or by a pricing service or other parties in accordance with the valuation procedures approved by the Board.

Under certain circumstances, a Fund may use an independent pricing service to calculate the fair market value of foreign equity securities on a daily basis by applying valuation factors to the last sale price or the mean price as noted above. The fair market values supplied by the independent pricing service will generally reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or the value of other instruments that have a strong correlation to the fair-valued securities. The independent pricing service also takes into account the current relevant currency exchange rate. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities may trade on days when Shares are not priced, the value of securities held by a Fund can change on days when Shares cannot be redeemed or purchased. In the event that a foreign security’s market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before a Fund’s calculation of NAV), the security will be valued at its fair market value as determined in good faith by the Adviser in accordance with procedures approved by the Board as discussed below. Without fair valuation, it is possible that short-term traders could take advantage of the

arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that it will prevent dilution of the Fund's NAV by short-term traders. In addition, because the Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of these portfolio securities may change on days when you may not be able to buy or sell Shares.

Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services or other parties in accordance with the valuation procedures approved by the Board. As a result, the NAV of the Shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the Exchange is closed and an investor is not able to purchase, redeem or exchange Shares.

Shares are valued at the close of regular trading on the Exchange (normally 4:00 p.m., Eastern time) (the "Exchange Close") on each day that the Exchange is open. For purposes of calculating the NAV, the Funds normally use pricing data for domestic equity securities received shortly after the Exchange Close and does not normally take into account trading, clearances or settlements that take place after the Exchange Close. Domestic fixed income and foreign securities are normally priced using data reflecting the earlier closing of the principal markets for those securities. Information that becomes known to a Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of the security or the NAV determined earlier that day.

When market quotations are insufficient or not readily available, the Funds may value securities at fair value or estimate their value as determined in good faith by the Board or its designees, pursuant to procedures approved by the Board. Fair valuation may also be used by the Board if extraordinary events occur after the close of the relevant market but prior to the Exchange Close.

A Fund may hold investments, such as private placements, interests in commodity pools, other non-traded securities or temporarily illiquid investments, for which market quotations are not readily available or are determined to be unreliable. These investments will be valued at their fair market value as determined using the "fair value" procedures approved by the Board. The Board has designated the Adviser as its "Valuation Designee" to execute these procedures. The Valuation Designee may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

Valuation Process. Fair value determinations are required for the following securities: (i) securities for which market quotations are insufficient or not readily available on a particular business day (including securities for which there is a short and temporary lapse in the provision of a price by the regular pricing source); (ii) securities for which, in the judgment of the Adviser, the prices or values available do not represent the fair value of the instrument. Factors which may cause the Adviser to make such a judgment include, but are not limited to, the following: only a bid price or an asked price is available; the spread between bid and asked prices is substantial; the frequency of sales; the thinness of the market; the size of reported trades; and actions of the securities markets, such as the suspension or limitation of trading; (iii) securities determined to be illiquid; (iv) securities with respect to which an event that will affect the value thereof has occurred (a "significant event") since the closing prices were established on the principal exchange on which they are traded, but prior to a Fund's calculation of its NAV. Specifically, interests in commodity pools or managed futures pools are valued on a daily basis by reference to the closing market prices of each futures contract or other asset held by a pool, as adjusted for pool expenses. Restricted or illiquid investments, such as private placements or non-traded securities are valued via inputs from the Adviser valuation based upon the current bid for the security from two or more independent dealers or other parties reasonably familiar with the facts and circumstances of the security (who should take into consideration all relevant factors as may be appropriate under the circumstances). If the Adviser is unable to obtain a current bid from such independent dealers or other independent parties, the Adviser shall determine the fair value of such security using the following factors: (i) the type of security; (ii) the cost at date of purchase; (iii) the size and nature of the relevant Fund's holdings; (iv) the discount from market value of unrestricted securities of the same class at the time of purchase and subsequent thereto; (v) information as to any transactions or offers with respect to the security; (vi) the nature and duration of restrictions on disposition of the security and the existence of any registration rights; (vii) how the yield of the security compares to similar securities of companies of similar or equal creditworthiness; (viii) the level of recent trades of similar or comparable securities; (ix) the liquidity characteristics of the security; (x) current market conditions; and (xi) the market value of any securities into which the security is convertible or exchangeable.

Standards For Fair Value Determinations. As a general principle, the fair value of a security is the amount that a Fund might reasonably expect to realize upon its current sale. The Trust has adopted Financial Accounting Standards Board Statement of Financial Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosures (“ASC 820”). In accordance with ASC 820, fair value is defined as the price that a Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 establishes a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity’s own assumptions about the assumptions market participants would use in pricing the asset or liability, developed based on the best information available under the circumstances.

Various inputs are used in determining the value of a Fund’s investments relating to ASC 820. These inputs are summarized in the three broad levels listed below.

Level 1 – quoted prices in active markets for identical securities.

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments).

The Adviser takes into account the relevant factors and surrounding circumstances, which may include: (i) the nature and pricing history (if any) of the security; (ii) whether any dealer quotations for the security are available; (iii) possible valuation methodologies that could be used to determine the fair value of the security; (iv) the recommendation of the portfolio managers of the Funds with respect to the valuation of the security; (v) whether the same or similar securities are held by other funds managed by the Adviser or other funds and the method used to price the security in those funds; (vi) the extent to which the fair value to be determined for the security will result from the use of data or formulae produced by independent third parties and (vii) the liquidity or illiquidity of the market for the security.

The Board’s Determination. The Board meets at least quarterly to consider the valuations provided by the Adviser and to ratify the valuations made for the applicable securities. The Board considers the reports provided by the Adviser, including follow up studies of subsequent market-provided prices when available, in reviewing and determining in good faith the fair value of the applicable portfolio securities.

The Trust expects that the Exchange will be closed on the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

Creation Units

Each Fund sells and redeems Shares in Creation Units on a continuous basis through the Distributor, without a sales load, at the NAV next determined after receipt of an order in proper form on any Business Day. A “Business Day” is any day on which the Exchange is open for business. The Exchange observes the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

A Creation Unit is an aggregation of 10,000 Shares for each Fund. The Board may declare a split or a consolidation in the number of Shares outstanding of a Fund or Trust and make a corresponding change in the number of Shares in a Creation Unit.

Authorized Participants

Only Authorized Participants that have entered into agreements with the Distributor may purchase or redeem Creation Units. In order to be an Authorized Participant, a firm must be either a broker-dealer or other participant (“Participating Party”) in the Continuous Net Settlement System (“Clearing Process”) of the National Securities Clearing Corporation (“NSCC”) or a

participant in DTC with access to the DTC system (“DTC Participant”), and you must execute an agreement (“Participant Agreement”) with the Distributor that governs transactions in a Fund’s Creation Units.

Investors who are not Authorized Participants but want to transact in Creation Units may contact the Distributor for the names of Authorized Participants. An Authorized Participant may require investors to enter into a separate agreement to transact through it for Creation Units and may require orders for purchases of shares placed with it to be in a particular form. Investors transacting through a broker that is not itself an Authorized Participant and therefore must still transact through an Authorized Participant may incur additional charges. There are expected to be a limited number of Authorized Participants at any one time.

Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor. Market disruptions and telephone or other communication failures may impede the transmission of orders.

Transaction Fees

A fixed fee payable to the Custodian is imposed on each creation and redemption transaction regardless of the number of Creation Units involved in the transaction (“Fixed Fee”). Purchases and redemptions of Creation Units for cash or involving cash-in-lieu (as defined below) are required to pay an additional variable charge to compensate the Fund and its ongoing shareholders for brokerage and market impact expenses relating to Creation Unit transactions (“Variable Charge,” and together with the Fixed Fee, the “Transaction Fees”). The Adviser may waive or adjust the Transaction Fees, including the Fixed Fee and/or Variable Charge (shown in the table below), from time to time. In such cases, the Authorized Participant reimburses the relevant Fund for, among other things, any difference between the market value at which the securities and/or financial instruments were purchased by the Fund and the cash-in-lieu amount, applicable registration fees, brokerage commissions and certain taxes. In addition, purchasers of Creation Units are responsible for the costs of transferring the Deposit Securities to the account of the Fund.

Fee for In-Kind and Cash Purchases	Maximum Additional Variable Charge for Cash Purchases*
\$250	2.00%

*As a percentage of the amount invested.

Investors who use the services of a broker, or other such intermediary may be charged a fee for such services.

The Clearing Process

Transactions by an Authorized Participant that is a Participating Party using the NSCC system are referred to as transactions “through the Clearing Process.” Transactions by an Authorized Participant that is a DTC Participant using the DTC system are referred to as transactions “outside the Clearing Process.” The Clearing Process is an enhanced clearing process that is available only for certain securities and only to DTC participants that are also participants in the Continuous Net Settlement System of the NSCC. In-kind (portions of) purchase orders not subject to the Clearing Process will go through a manual clearing process run by DTC. Portfolio Deposits that include government securities must be delivered through the Federal Reserve Bank wire transfer system (“Federal Reserve System”). Fund Deposits that include cash may be delivered through the Clearing Process or the Federal Reserve System. In-kind deposits of securities for orders outside the Clearing Process must be delivered through the Federal Reserve System (for government securities) or through DTC (for corporate securities).

Foreign Securities

Because the portfolio securities of the Funds may trade on days that the Exchange is closed or are otherwise not Business Days for the Funds, shareholders may not be able to redeem their shares of the Funds, or to purchase or sell shares of the Funds on the Exchange, on days when the NAV of the Funds could be significantly affected by events in the relevant foreign markets.

Purchasing Creation Units

Portfolio Deposit

The consideration for a Creation Unit generally consists of the Deposit Securities and a Cash Component. Together, the Deposit Securities and the Cash Component constitute the “Portfolio Deposit.” The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the Deposit Securities. Thus, the Cash Component is equal to the difference between (x) the NAV per Creation Unit of a Fund and (y) the market value of the

Deposit Securities. If (x) is more than (y), the Authorized Participant will pay the Cash Component to the Fund. If (x) is less than (y), the Authorized Participant will receive the Cash Component from the Fund.

On each Business Day, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the Adviser or its agent through the Custodian makes available through NSCC the name and amount of each Deposit Security in the current Portfolio Deposit (based on information at the end of the previous Business Day) for a Fund and the (estimated) Cash Component, effective through and including the previous Business Day, per Creation Unit. The Deposit Securities announced are applicable to purchases of Creation Units until the next announcement of Deposit Securities.

Payment of any stamp duty or the like shall be the sole responsibility of the Authorized Participant purchasing a Creation Unit. The Authorized Participant must ensure that all Deposit Securities properly denote change in beneficial ownership.

Custom Orders and Cash-in-Lieu

Each Fund may, in its sole discretion, permit or require the substitution of an amount of cash (“cash-in-lieu”) to be added to the Cash Component to replace any Deposit Security. Each Fund may permit or require cash-in-lieu when, for example, a Deposit Security may not be available in sufficient quantity for delivery or may not be eligible for transfer through the systems of DTC or the Clearing Process. Similarly, each Fund may permit or require cash in lieu of Deposit Securities when, for example, the Authorized Participant or its underlying investor is restricted under U.S. or local securities laws or policies from transacting in one or more Deposit Securities. Each Fund complies with the federal securities laws in accepting Deposit Securities including that the Deposit Securities are sold in transactions that would be exempt from registration under the Securities Act. All orders involving cash-in-lieu, as well as certain other types of orders, are considered to be “Custom Orders.” Each Fund may enter into other types of Custom Orders.

Purchase Orders

To order a Creation Unit, an Authorized Participant must submit an irrevocable purchase order to the Distributor.

Timing of Submission of Purchase Orders

An Authorized Participant must submit an irrevocable purchase order no later than the earlier of (i) 4:00 p.m. Eastern Time or (ii) the closing time of the bond markets and/or the trading session on the Exchange, on any Business Day in order to receive that Business Day’s NAV (“Cut-off Time”). The Cut-off Time for Custom Orders is generally two hours earlier. The Business Day the order is deemed received by the Distributor is referred to as the “Transmittal Date.” An order to create Creation Units is deemed received on a Business Day if (i) such order is received by the Distributor by the Cut-off Time on such day and (ii) all other procedures set forth in the Participant Agreement are properly followed. Persons placing or effectuating custom orders and/or orders involving cash should be mindful of time deadlines imposed by intermediaries, such as DTC and/or the Federal Reserve Bank wire system, which may impact the successful processing of such orders to ensure that cash and securities are transferred by the “Settlement Date,” which is generally the Business Day immediately following the Transmittal Date (“T+1”) for cash and the second Business Day following the Transmittal Date for securities (“T+2”).

Orders Using the Clearing Process

If available, (portions of) orders may be settled through the Clearing Process. In connection with such orders, the Distributor transmits, on behalf of the Authorized Participant, such trade instructions as are necessary to effect the creation order. Pursuant to such trade instructions, the Authorized Participant agrees to deliver the requisite Portfolio Deposit to the Funds, together with such additional information as may be required by the Distributor. Cash Components are delivered using either the Clearing Process or the Federal Reserve System.

Orders Outside the Clearing Process

If the Clearing Process is not available for (portions of) an order, Portfolio Deposits will be made outside the Clearing Process. Orders outside the Clearing Process must state that the DTC Participant is not using the Clearing Process and that the creation of Creation Units will be effected through DTC. The Portfolio Deposit transfer must be ordered by the DTC Participant on the Transmittal Date in a timely fashion so as to ensure the delivery of Deposit Securities (whether standard or custom) through DTC to the relevant Fund’s account by 11:00 a.m., Eastern time, on T+1. The Cash Component, along with any cash-in-lieu and Transaction Fee, must be transferred directly to the Custodian through the Federal Reserve System in a timely manner so as to be received by the Custodian no later than 12:00 p.m., Eastern Time, on T+1. If the Custodian does not receive both the Deposit Securities and the cash by the appointed time, the order may be canceled. A canceled order may be resubmitted the following Business Day but must conform to that Business Day’s Portfolio Deposit.

Authorized Participants that submit a canceled order will be liable to the relevant Fund for any losses incurred by the Fund in connection therewith.

Orders involving foreign Deposit Securities are expected to be settled outside the Clearing Process. Thus, upon receipt of an irrevocable purchase order, the Distributor notifies the Adviser and the Custodian of such order. The Custodian, who will have caused the appropriate local sub-custodian(s) of the relevant Fund to maintain an account into which an Authorized Participant may deliver Deposit Securities (or cash-in-lieu), with adjustments determined by the Fund, will then provide information of the order to such local sub-custodian(s). The ordering Authorized Participant will then deliver the Deposit Securities (and any cash-in-lieu) to the Fund's account at the applicable local sub-custodian. The Authorized Participant must also make available on or before the contractual settlement date, by means satisfactory to the Fund, immediately available or same day funds in U.S. dollars estimated by the Fund to be sufficient to pay the Cash Component and Transaction Fee. When a relevant local market is closed due to local market holidays, the local market settlement process will not commence until the end of the local holiday period. Settlement must occur by 2:00 p.m., Eastern Time, on the contractual settlement date.

Acceptance of Purchase Order

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the relevant Fund. Each Fund's determination shall be final and binding.

Each Fund reserves the absolute right to reject or revoke acceptance of a purchase order transmitted to it by the Distributor if (a) the order is not in proper form; (b) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of the Fund; (c) the Deposit Securities delivered do not conform to the Deposit Securities for the applicable date; (d) acceptance of the Deposit Securities would have certain adverse tax consequences to the Fund; (e) the acceptance of the Portfolio Deposit would, in the opinion of counsel, be unlawful; (f) the acceptance of the Portfolio Deposit would otherwise, in the discretion of the Trust, Fund or the Adviser, have an adverse effect on the Trust, Fund or the rights of beneficial owners; or (g) in the event that circumstances outside the control of the Trust, the Distributor and the Adviser make it for all practical purposes impossible to process purchase orders. Examples of such circumstances include acts of God; public service or utility problems resulting in telephone, telecopy or computer failures; fires, floods or extreme weather conditions; market conditions or activities causing trading halts; systems failures involving computer or other informational systems affecting the Trust, the Distributor, DTC, NSCC, the Adviser, the Custodian, a sub-custodian or any other participant in the creation process; and similar extraordinary events. The Distributor shall notify an Authorized Participant of its rejection of the order. The Funds, the Custodian, any sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Portfolio Deposits, and they shall not incur any liability for the failure to give any such notification.

Issuance of a Creation Unit

Once a Fund has accepted an order, upon next determination of the Fund's NAV, the Fund confirms the issuance of a Creation Unit, against receipt of payment, at such NAV. The Distributor will transmit a confirmation of acceptance to the Authorized Participant that placed the order.

Except as provided below, a Creation Unit is not issued until the relevant Fund obtains good title to the Deposit Securities and the Cash Component, along with any cash-in-lieu and Transaction Fee. The delivery of Creation Units generally occurs no later than T+2 except with respect to certain foreign securities.

In certain cases, Authorized Participants will create and redeem Creation Units on the same trade date. In these instances, the Trust reserves the right to settle these transactions on a net basis.

With respect to orders involving foreign Deposit Securities, when the applicable local sub-custodian(s) have confirmed to the Custodian that the Deposit Securities (or cash-in-lieu) have been delivered to the relevant Fund's account at the applicable local sub-custodian(s), the Distributor and the Adviser shall be notified of such delivery, and the Fund will issue and cause the delivery of the Creation Unit. While, as stated above, Creation Units are generally delivered on T+2, the Fund reserves the right to settle redemption transactions on a basis other than T+2 but by T+7, if necessary or appropriate under the circumstances and compliant with applicable law. Delayed settlement may occur due to a number of different reasons, including, without limitation, settlement cycles for the underlying securities, unscheduled market closings, an effort to link distribution to dividend record dates and ex-dates and newly announced holidays. For example, the redemption settlement process may be extended beyond T+2 because of the occurrence of a holiday in a non-U.S. market or in the U.S. bond market that is not a holiday observed in the U.S. equity market. In addition, a Fund may settle Creation Unit transactions on a basis other than T+2 in order to accommodate foreign market holiday schedules, to account for different

treatment among foreign and U.S. markets of dividend record dates and ex-dividend dates (that is the last day the holder of a security can sell the security and still receive dividends payable on the security), and in certain other circumstances.

A Fund may issue a Creation Unit prior to receiving good title to the Deposit Securities, under the following circumstances. Pursuant to the applicable Participant Agreement, a Fund may issue a Creation Unit notwithstanding that (certain) Deposit Securities have not been delivered, in reliance on an undertaking by the relevant Authorized Participant to deliver the missing Deposit Securities as soon as possible, which undertaking is secured by such Authorized Participant's delivery to and maintenance with the Custodian of collateral having a value equal to at least 115% of the value of the missing Deposit Securities ("Collateral"), as adjusted by time to time by the Adviser. Such Collateral will have a value greater than the NAV of the Creation Unit on the date the order is placed. Such Collateral must be delivered no later than 2:00 p.m., Eastern Time, on T+1. The only Collateral that is acceptable to the Fund is cash in U.S. Dollars.

While (certain) Deposit Securities remain undelivered, the Collateral shall at all times have a value equal to at least 115% (as adjusted by the Adviser) of the daily marked-to-market value of the missing Deposit Securities. At any time, a Fund may use the Collateral to purchase the missing securities, and the Authorized Participant will be liable to the Fund for any costs incurred thereby or losses resulting therefrom, whether or not they exceed the amount of the Collateral, including any Transaction Fee, any amount by which the purchase price of the missing Deposit Securities exceeds the market value of such securities on the Transmittal Date, brokerage and other transaction costs. The Trust will return any unused Collateral once all of the missing securities have been received by the Fund. More information regarding the Funds' current procedures for collateralization is available from the Distributor.

Cash Purchase Method

When cash purchases of Creation Units are available or specified for the Funds, they are effected in essentially the same manner as in-kind purchases. In the case of a cash purchase, the investor must pay the cash equivalent of the Portfolio Deposit. In addition, cash purchases will be subject to Transaction Fees, as described above.

Redeeming a Creation Unit

Redemption Basket

The consideration received in connection with the redemption of a Creation Unit generally consists of an in-kind basket of designated securities ("Redemption Securities") and a Cash Component. Together, the Redemption Securities and the Cash Component constitute the "Redemption Basket."

There can be no assurance that there will be sufficient liquidity in Shares in the secondary market to permit assembly of a Creation Unit. In addition, investors may incur brokerage and other costs in connection with assembling a Creation Unit.

The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the Redemption Securities. Thus, the Cash Component is equal to the difference between (x) the NAV per Creation Unit of the relevant Fund and (y) the market value of the Redemption Securities. If (x) is more than (y), the Authorized Participant will receive the Cash Component from the Fund. If (x) is less than (y), the Authorized Participant will pay the Cash Component to the Fund.

If the Redemption Securities on a Business Day are different from the Deposit Securities, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the Adviser or an agent through the Custodian makes available through NSCC the name and amount of each Redemption Security in the current Redemption Basket (based on information at the end of the previous Business Day) for the relevant Fund and the (estimated) Cash Component, effective through and including the previous Business Day, per Creation Unit. If the Redemption Securities on a Business Day are different from the Deposit Securities, all redemption requests that day will be processed outside the Clearing Process.

The right of redemption may be suspended or the date of payment postponed: (i) for any period during which the NYSE is closed (other than customary weekend and holiday closings); (ii) for any period during which trading on the NYSE is suspended or restricted; (iii) for any period during which an emergency exists as a result of which disposal of the Shares or determination of the ETF's NAV is not reasonably practicable; or (iv) in such other circumstances as permitted by the SEC, including as described below.

Custom Redemptions and Cash-in-Lieu

A Fund may, in its sole discretion, permit or require the substitution of cash-in-lieu to be added to the Cash Component to replace any Redemption Security. The Fund may permit or require cash-in-lieu when, for example, a Redemption Security may not be

available in sufficient quantity for delivery or may not be eligible for transfer through the systems of DTC or the Clearing Process. Similarly, a Fund may permit or require cash-in-lieu of Redemption Securities when, for example, the Authorized Participant or its underlying investor is restricted under U.S. or local securities law or policies from transacting in one or more Redemption Securities. Each Fund complies with the federal securities laws in satisfying redemptions with Redemption Securities, including that the Redemption Securities are sold in transactions that would be exempt from registration under the Securities Act. All redemption requests involving cash-in-lieu are considered to be "Custom Redemptions."

Redemption Requests

To redeem a Creation Unit, an Authorized Participant must submit an irrevocable redemption request to the Distributor.

An Authorized Participant submitting a redemption request is deemed to represent to the relevant Fund that it or, if applicable, the investor on whose behalf it is acting, (i) owns outright or has full legal authority and legal beneficial right to tender for redemption the Creation Unit to be redeemed and can receive the entire proceeds of the redemption, and (ii) all of the Shares that are in the Creation Unit to be redeemed have not been borrowed, loaned or pledged to another party nor are they the subject of a repurchase agreement, securities lending agreement or such other arrangement that would preclude the delivery of such Shares to the Fund. A Fund reserves the absolute right, in its sole discretion, to verify these representations, but will typically require verification in connection with higher levels of redemption activity and/or short interest in the Fund. If the Authorized Participant, upon receipt of a verification request, does not provide sufficient verification of the requested representations, the redemption request will not be considered to be in proper form and may be rejected by the Fund.

Timing of Submission of Redemption Requests

An Authorized Participant must submit an irrevocable redemption order no later than the Cut-off Time. The Cut-off Time for Custom Orders is generally two hours earlier. The Business Day the order is deemed received by the Distributor is referred to as the "Transmittal Date." A redemption request is deemed received if (i) such order is received by the Distributor by the Cut-off Time on such day and (ii) all other procedures set forth in the Participant Agreement are properly followed. Persons placing or effectuating Custom Redemptions and/or orders involving cash should be mindful of time deadlines imposed by intermediaries, such as DTC and/or the Federal Reserve System, which may impact the successful processing of such orders to ensure that cash and securities are transferred by the Settlement Date, as defined above.

Requests Using the Clearing Process

If available, (portions of) redemption requests may be settled through the Clearing Process. In connection with such orders, the Distributor transmits on behalf of the Authorized Participant, such trade instructions as are necessary to effect the redemption. Pursuant to such trade instructions, the Authorized Participant agrees to deliver the requisite Creation Unit(s) to the relevant Fund, together with such additional information as may be required by the Distributor. Cash Components are delivered using either the Clearing Process or the Federal Reserve System, as described above.

Requests Outside the Clearing Process

If the Clearing Process is not available for (portions of) an order, Redemption Baskets are delivered outside the Clearing Process. Orders outside the Clearing Process must state that the DTC Participant is not using the Clearing Process and that the redemption will be effected through DTC. The Authorized Participant must transfer or cause to be transferred the Creation Unit(s) of shares being redeemed through the book-entry system of DTC so as to be delivered through DTC to the Custodian by 10:00 a.m., Eastern Time, on received T+1. In addition, the Cash Component must be received by the Custodian by 12:00 p.m., Eastern Time, on T+1. If the Custodian does not receive the Creation Unit(s) and Cash Component by the appointed times on T+1, the redemption will be rejected, except in the circumstances described below. A rejected redemption request may be resubmitted the following Business Day.

Orders involving foreign Redemption Securities are expected to be settled outside the Clearing Process. Thus, upon receipt of an irrevocable redemption request, the Distributor notifies the Adviser and the Custodian. The Custodian will then provide information of the redemption to the relevant Fund's local sub-custodian(s). The redeeming Authorized Participant, or the investor on whose behalf is acting, will have established appropriate arrangements with a broker-dealer, bank or other custody provider in each jurisdiction in which the Redemption Securities are customarily traded and to which such Redemption Securities (and any cash-in-lieu) can be delivered from the Fund's accounts at the applicable local sub-custodian(s).

Acceptance of Redemption Requests

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust. The Trust's determination shall be final and binding.

Delivery of Redemption Basket

Once a Fund has accepted a redemption request, upon next determination of the Fund's NAV, the Fund will confirm the issuance of a Redemption Basket, against receipt of the Creation Unit(s) at such NAV, any cash-in-lieu and Transaction Fee. A Creation Unit tendered for redemption and the payment of the Cash Component, any cash-in-lieu and Transaction Fee will be effected through DTC. The Authorized Participant, or the investor on whose behalf it is acting, will be recorded on the book-entry system of DTC.

The Redemption Basket generally delivered to the redeeming Authorized Participant within T+2. Except under the circumstances described below, however, a Redemption Basket generally is not issued until the Creation Unit(s) are delivered to the Fund, along with the Cash Component, any cash-in-lieu and Transaction Fee.

In certain cases, Authorized Participants create and redeem Creation Units on the same trade date. In these instances, the Trust reserves the right to settle these transactions on a net basis.

Cash Redemption Method

When cash redemptions of Creation Units are available or specified for a Fund, they are effected in essentially the same manner as in-kind redemptions. In the case of a cash redemption, the investor will receive the cash equivalent of the Redemption Basket minus any Transaction Fees, as described above.

TAX STATUS

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. All shareholders should consult a qualified tax advisor regarding their investment in the Funds.

Each Fund has qualified and intends to continue to qualify and has elected to be treated as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Tax Code"), which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing of its distributions to shareholders. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying, the Funds should not be subject to federal income or excise tax on its net investment income or net capital gain, which are distributed to shareholders in accordance with the applicable timing requirements. Net investment income and net capital gain of the Funds will be computed in accordance with Section 852 of the Tax Code.

Net investment income is made up of dividends and interest less expenses. Net capital gain for a fiscal year is computed by taking into account any capital loss carry forwards of the Funds. Capital losses may be carried forward indefinitely and retain the character of the original loss. Capital loss carry forwards are available to offset future realized capital gains. To the extent that these carry forwards are used to offset future capital gains it is probable that the amount offset will not be distributed to shareholders.

As of September 30, 2024, the components of accumulated earnings on a tax basis were as follows:

<u>Portfolio</u>	<u>Undistributed Ordinary Income</u>	<u>Undistributed Long-Term Capital Gains</u>	<u>Post October Loss and Late Year Loss</u>	<u>Capital Loss Carry Forwards</u>	<u>Other Book/Tax Differences</u>	<u>Unrealized Appreciation/ (Depreciation)</u>	<u>Total Accumulated Earnings/(Deficits)</u>
PlanRock Alternative Growth ETF	\$ —	\$ 89,349	\$ (1,378)	\$ —	\$ —	355,719	\$ 443,690
PlanRock Market Neutral Income ETF	8,274	—	(157,289)	—	—	99,020	(49,995)

Each Fund intends to distribute all of its net investment income, any excess of net short-term capital gains over net long-term capital losses, and any excess of net long-term capital gains over net short-term capital losses in accordance with the timing requirements imposed by the Tax Code and therefore should not be required to pay any federal income or excise taxes. Distributions of net investment income will be made annually for the Funds. Distributions of net capital gain, if any, are made annually no later than December 31 of each year. Both types of distributions will be in shares of the Fund unless a shareholder elects to receive cash.

To be treated as a regulated investment company under Subchapter M of the Tax Code, each Fund must also (a) derive at least 90% of its gross income from dividends, interest, payments with respect to securities loans, net income from certain publicly traded partnerships and gains from the sale or other disposition of securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to the business of investing in such securities or currencies, and (b) diversify its holding so that, at the end of each fiscal quarter, (i) at least 50% of the market value of the Fund's assets is represented by cash, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the market value of the Fund's assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of its assets is invested in the securities of (other than U.S. government securities or the securities of other regulated investment companies) any one issuer, two or more issuers that the Fund controls and that are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships.

If a Fund fails to qualify as a regulated investment company under Subchapter M in any fiscal year, it is treated as a corporation for federal income tax purposes. As such the Fund would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Shareholders of the Fund generally would not be liable for income tax on the Fund's net investment income or net realized capital gains in their individual capacities. Distributions to shareholders, whether from the Fund's net investment income or net realized capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of the Fund.

Each Fund is subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in Section 4982 of the Tax Code. The formula requires payment to shareholders during a calendar year of distributions representing at least 98% of the Fund's ordinary income for the calendar year and at least 98.2% of its capital gain net income (i.e., the excess of its capital gains over capital losses) realized during the one-year period ending October 31 during such year plus 100% of any income that was neither distributed nor taxed to the Fund during the preceding calendar year. Under ordinary circumstances, each Fund expects to time its distributions so as to avoid liability for this tax.

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans are exempt from income taxation under the Tax Code.

Distributions of taxable net investment income and the excess of net short-term capital gain over net long-term capital loss are taxable to shareholders as ordinary income.

Distributions of net capital gain ("capital gain dividends") generally are taxable to shareholders as long-term capital gain; regardless of the length of time the shares of the Trust have been held by such shareholders.

Certain U.S. shareholders, including individuals and estates and trusts, are subject to an additional 3.8% Medicare tax on all or a portion of their "net investment income," which should include dividends from the Funds and net gains from the disposition of shares of the Funds. U.S. shareholders are urged to consult their own tax advisors regarding the implications of the additional Medicare tax resulting from an investment in the Funds.

Redemption of Fund shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder's tax basis in his or her Fund shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of taxable net investment income and net capital gain are taxable as described above, whether received in additional cash or shares. Shareholders electing to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the NAV of a share on the reinvestment date.

All distributions of taxable net investment income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, are deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Under the Tax Code, the Funds are required to report to the Internal Revenue Service all distributions of taxable income and capital gains as well as gross proceeds from the redemption or exchange of Fund shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the Tax Code, distributions of taxable net investment income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax in the case of non-exempt shareholders who fail to furnish the investment company with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or the relevant Fund is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was purchased, even though the holder receives no interest payment in cash on the security during the year. In addition, pay-in-kind securities will give rise to income, which is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by a Fund may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount ("OID") is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by a Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. Market discount generally accrues in equal daily installments. A Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by a Fund may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, the Fund is required to include the acquisition discount, or OID, in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A Fund may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

If a Fund holds the foregoing kinds of securities, it may be required to pay out as an income distribution each year an amount that is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). The Fund may realize gains or losses from such liquidations. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Shareholders of each Fund may be subject to state and local taxes on distributions received from the Fund and on redemptions of the Shares.

A brief explanation of the form and character of the distribution accompany each distribution. In January of each year, the Funds issue to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisors about the application of federal, state and local and foreign tax law in light of their particular situation.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Cohen & Company, Ltd. located at 1835 Market St., Suite 310, Philadelphia, PA 19103 serves as the Funds' independent registered public accounting firm for the current fiscal year. The firm provides services including (i) audit of annual financial statements, and (ii) assistance and consultation in connection with SEC filings.

LEGAL COUNSEL

Thompson Hine LLP, 41 South High Street, Suite 1700, Columbus, OH 43215, serves as the Trust's legal counsel.

FINANCIAL STATEMENTS

The financial statements and report of the independent registered public accounting firm required to be included in this SAI are hereby incorporated by reference to the [Fund's Financial Statements for the fiscal year ended September 30, 2024](#). You can obtain copies of the financial statements without charge by calling the Funds at 800-677-6025.

APPENDIX A
PlanRock Investment Management, LLC
Proxy Voting Policies and Procedures
January 26, 2023

If an investment adviser exercises voting authority with respect to client securities, [Rule 206\(4\)-6](#) requires the investment adviser to adopt and implement written policies and procedures reasonably designed to ensure that client securities are voted in the best

interest of the client. This requirement is consistent with legal interpretations which hold that an investment adviser's fiduciary duty includes handling the voting of proxies on securities held in client accounts over which the investment adviser exercises investment or voting discretion, in a manner consistent with the best interest of the client.

- The Firm adopts and implements written policies and procedures that are reasonably designed to ensure that it votes client securities in the best interest of clients. At a minimum, these procedures must include how the Firm addresses material conflicts that may arise between its interests and those of its clients.
- The Firm discloses to clients how they may obtain information about how it voted with respect to their securities.
- The Firm describes to clients the Firm's proxy voting policies and procedures and, upon request, furnishes a copy of the policies and procedures to the requesting client.

23.1 Proxy Voting Policy

23.1.1 Voting Policy – Clients

The Firm does not currently vote proxies for its clients.

23.1.2 Voting Policy – Funds

Pursuant to rules established by the SEC under the 1940 Act, the Firm has adopted formal, written guidelines for proxy voting.

The Firm exercises its proxy voting rights with regard to the companies in the Firm's investment Fund, with the goals of maximizing the value of the Fund's investments, promoting accountability of a company's management and board of directors to its shareholders, aligning the interests of management with those of shareholders, and increasing transparency of a company's business and operations.

If the Fund invest in other investment companies in excess of the limitations in section 12(d)(1) of the 40 Act. The Firm will enact the safe harbor of section 12(d)(1)(F) of the 40 Act to invest in underlying investment companies, which has less restrictions. In benefiting from the safe harbor of section 12(d)(1)(F), Funds will mirror vote proposals on proxies issued by underlying investment companies. Mirror voting means that the Fund votes its shares in the same proportion that all shares of the ETFs are

voted, or in accordance with instructions received from fund shareholders, pursuant to Section 12(d)(1)(F) of the 40 Act. The Firm will post vote, seek to obtain a certification from the tabulation service, and/or the relevant investment company that the Firm's proxies were mirror voted in the same proportion as all other shares voted.

The Adviser provides quarterly certifications with respect to its adherence to its proxy voting and exemptive order policies and procedures to the Fund CCO.

23.2 Proxy Voting Policy

23.2.1 Voting Policy – Clients

The Firm does not currently vote proxies for its clients.

23.2.2 Voting Policy – Funds

Pursuant to rules established by the SEC under the 1940 Act, the Firm has adopted formal, written guidelines for proxy voting.

The Firm exercises its proxy voting rights with regard to the companies in the Firm's investment Fund, with the goals of maximizing the value of the Fund's investments, promoting accountability of a company's management and board of directors to its shareholders, aligning the interests of management with those of shareholders, and increasing transparency of a company's business and operations.

If the Fund invest in other investment companies in excess of the limitations in section 12(d)(1) of the 40 Act. The Firm will enact the safe harbor of section 12(d)(1)(F) of the 40 Act to invest in underlying investment companies, which has less restrictions. In benefiting from the safe harbor of section 12(d)(1)(F), Funds will mirror vote proposals on proxies issued by underlying investment companies. Mirror voting means that the Fund votes its shares in the same proportion that all shares of the ETFs are voted, or in accordance with instructions received from fund shareholders, pursuant to Section 12(d)(1)(F) of the 40 Act. The Firm will post vote, seek to obtain a certification from the tabulation service, and/or the relevant investment company that the Firm's proxies were mirror voted in the same proportion as all other shares voted.

The Adviser provides quarterly certifications with respect to its adherence to its proxy voting and exemptive order policies and procedures to the Fund CCO.
